MEDFORD
Medford Mercury Print
1917

Note from the Medford Historical Society and Museum regarding the scans of this volume:

The original 1916 book was, unfortunately, rather poorly printed, resulting in many pages with blurry type, faint type, and spotty "artifacts" from other pages as the result of original pages with still-wet ink being stacked on other freshly printed pages.

So many spots and dirty and distorted text also made the process of converting the scanned pages into searchable text more difficult, and the results are not always as clear as they could be.

We apologize for the condition of these scans, but the amount of hand-work required to clean up these pages would have been an extremely daunting task.

SECOND INAUGURAL ADDRESS

OF

HON. BENJAMIN F. HAINES

MAYOR OF MEDFORD

DELIVERED

January First, Nineteen Hundred Seventeen

For the great trust and confidence that the citizens of Medford have shown by once more electing me to the office of chief executive of our city, I am sincerely proud and deeply grateful. The magnificent majority which I received demonstrates that the projects which I have furthered, and the work which I have started and projected, have met with the approval of the voting strength of Medford. Inspired by this wonderful showing of trust and confidence, and by this splendid endorsement, I will, if possible, more energetically than ever, endeavor to place Medford in the forefront of all municipalities of this Commonwealth, and give to our beloved city, a clean, progressive administration. It will ever be in my mind that when the voice of the people was heard, appreciation of earnest endeavor was the keynote of success.

As mayor of the City of Medford, I stand unpledged to any party, faction or interest, having in mind only our city's welfare. I shall continue, as in the past, a business-like, non-partisan administration. The verdict of the last election is as pleasing to me as it is to the people. The incident is closed, the decision was conclusive. You were selected to aid, to assist and to co-operate with me in furthering those policies which I have ever advocated for the good and best interests of our people, and which have been approved and endorsed at our last election.

Any divergence from a loyal support of these measures becomes a breach of faith and will be met with severe and well merited rebuke, when the opportunity offers. cent vicious compaign instigated by enemies of the City of Medford, intoxicated with hatred, and hysterical in their attempt to dominate and to obstruct our interests, is over-Still there may be some remnants even in the board of aldermen of that obstructive and destructive policy, prompted by vicious, revengeful and selfish motives. In the future, as in the past, time always is at hand when the people in their indignation, and wrath will arise and place a tablet to inefficiency and prejudice over the political graves. of those who seek to injure our best interests and to hold back the hands of time. Realizing then that the voice of the people has been heard in no indistinct tones, let us work in harmony for the good and welfare of our city.

I believe that you should be economical, but not penurious, always with the best interests of all at heart.

On September 26, 1916, one of our ablest citizens and most untiring workers for the public good of the City of Medford, passed into the great beyond, Richard J. Dwyer, who served the City of Medford faithfully and well through many long years in public office—a man of wonderful

knowledge, great sagacity, unbounded resourcefulness, and with all a warm-hearted, broad-minded, red-blooded man, whose place seems impossible to fill. Certain I am that no man in Medford will ever be more conversant with her past and present and more hopeful of her future.

excurrent that give the fighter of things of

Peace to the just man's memory,—let it grow.

Greener with years, and blossom through the flight

Of ages; let the mimic canvas show

His calm benevolent features; let the light

Stream on his deeds of love, that shunned the sight

Of all but heaven, and, in the book of fame,

The glorious record of his virtues write,

And hold it up to men, and bid them claim

A palm like his, and catch from him the hallowed flame.

Of late there has been much discussion in regard to the tax rate, and it seems at this time fitting to inform you that in all probability, since we have been obliged to exmend such vast sums of money on improvements, it will be difficult to better the situation. Still more money must be expended to place us where we belong among other cities in the Commonwealth. These improvements, so long delayed, come upon us with an insistence which cannot be denied. We must have the best of schools for our children. the best of streets, the best of sidewalks, and our safety and health must be preserved by efficient, up-to-date police and fire departments and a board of health with absolute powers. The city must be well lighted and money must be expended upon the parks to make them useful as well as cornamental. These improvements, so necessary for the happiness, contentment, well being, safety and health of our people, can only be obtained by increased expenditures. 'The high cost of living dominates the entire country in relation to the individual and each and every municipality is affected by the same increased cost of maintenance. No

city can be governed or conducted on hard and fast business lines, and it is never intended that we should grind out wealth from our improvements at the awful cost of human minds and souls and happiness. The intent of the citizens as voiced by giving Saturday half-holidays, twoweeks' vacation, pensions to the firemen, policemen and city employees is to conduct this municipality under ideal and humane conditions, rather than as a private moneymaking corporation. I feel sure that the lead which the municipalities of the Commonwealth of Massachusetts have taken, in passing the Workmen's Compensation Act, which takes care of the injury of any laborer employed by the city, the Mothers' Pension Act, which in time will do away with foundling asylums and poor houses, and allow the children to be brought up at home with a mother's love and affection; the Laborer's, Police, Firemen's Pension Acts, with the laborer's vacation and Saturday half-holidays and with the acts calling for public dispensaries and tubercular hospitals will soon be followed by private business corporations which will find it for the best interests to see to it that humane conditions exist.

Our city is growing. Our citizens demand a wider scope of municipal service every day. The cost of carrying on the business of the city has increased with the increased operating costs of other business. Supplies are higher—hay, grain, coal, cement, iron, gasoline, material of all kinds have advanced in price. Labor is higher, men work fewer hours; Saturdays are but half a day and time must be allowed for vacations. Policemen and firemen demand and receive a fair wage and the higher cost of living demands consideration.

WATER AND SEWER DEPARTMENT.

For the first time in recent years, this department is well equipped, up-to-date, and run on a 20th century business basis. Great and good results are best attained in a city by taking care of a pure supply of water and providing modern sanitation. This department has been conducted in a most efficient manner, and where unpopularity once reigned supreme, the public are now made to feel that their every complaint will be heard and considered fairly and justly.

OVERSEERS OF THE POOR.

When, through my work in the legislature, there was passed to be enacted the legislation known as the Widow's Pension Bill, I considered that cities such as ours would be relieved of responsibilities of almshouses and public poor, even though bringing up children in their own homes with their own mothers would be at an advanced cost. Great good is being accomplished, but our city has been of such rapid growth, that we find it necessary, year after year, to increase our expenditures in this department. I find the work done by the overseers to be in conformance with the most modern, up-to-date methods, and I commend them highly for this year's curtailment of expenditures.

PARK DEPARTMENT.

Our parks are in excellent condition, under the management of a most efficient body of men who give unsparingly of their time for the good and welfare of our people. It is a pleasure to commend them to you for appreciation. This year we have been able to lay out baseball diamonds and football fields in the various parks, and have had equip-

ment for our younger children in the way of swings, slides, seesaws and other apparatus, and we can view with pride hundreds of children who daily take advantage of these outdoor breathing places so necessary to the health of our children in these days of conjected growth.

GYPSY AND BROWN-TAIL MOTH DEPARTMENT.

Less money has been spent in this department than in previous years and the policy of economy has not impaired its efficiency. The work has been thorough, scientific, and great results have been accomplished, so that we can now feel sure that at least we have these dangerous pests under absolute control.

CITY PHYSICIAN.

Our city physician has been ever alert to the call of the poor and to the preservation of our public health. At all places, all times and under all circumstances, he has shown great devotion to the city's welfare. In Dr. Edward W. Barrett, we have an experienced physician as a servant whose place it will be difficult to fill.

BOARD OF HEALTH.

The quick, effective work of our active board of health has met every emergency. Great praise is due them for the excellent results in handling the epidemic of infantile paralysis, which so alarmed us in the summer and early fall. The board is awake to a broad scope of action and is constantly increasing its careful oversight of the health of our city. Modern, up-to-date, thorough and efficient, their standing in the Commonwealth does much to further Medford's reputation, as a city, healthful and wholesome in which to live.

CEMETERY DEPARTMENT.

This department, composed as it is of new members, has met the various difficulties and emergencies as they have arisen, free from traditions of the past, and have already placed their department on a paying basis. Here I desire to inform the public that upon a thorough examination into the conditions which existed in this department, under the previous administrations, I am convinced that the cemetery trustees of the years 1913 and 1914 were without blame for the loss of the city's funds and I shall, with the consent of the board of aldermen, ask that the cases brought against them be dismissed.

SCHOOL DEPARTMENT.

In this department, I have co-operated with every good improvement to raise the standard of our public schools. I have sacrificed many projects which seemed essential, in order that the Hancock, the Osgood, and the new Junior High School might be constructed. More than any city in the Commonwealth are we under great expense for the education of our children. The cost of proper education is the largest and most important item in our municipal expenses. It is an ever increasing burden, and under the present system, there seems to be no possible solution of this great problem. It can plainly be seen that, with an increased number of school rooms, more teachers must be employed. While education is the most important factor in municipal life and in the development of citizenship in any community, still a more equitable distribution of the expenses for the support of the schools should be obtained.

A solution of this problem is an equalization of the

cost of school and educational purposes throughout the state, so that a city situated as is the City of Medford, with a large school population, can be aided by the distribution of the proposed state school fund.

Year after year, a bill of this nature has been presented to the legislature and it has been my ambition to aid in the passing of this measure, the adoption of which will mean the saving of many thousands of dollars to the City of Medford and a probable decrease in our tax rate. This year it seems more probable than ever that a legislative act of this kind will be enacted.

THE PUBLIC LIBRARY.

The public library is next in importance to the schools and the work done by the trustees has been thoroughly satisfactory to the administration and to the citizens of our city.

CITY ENGINEER'S DEPARTMENT.

This department has accomplished greater results this year than ever before and now seems to be well equipped to carry on the work, and to stride, side by side, with our great and certain growth.

FIRE DEPARTMENT.

We have expanded and grown in this department, both in equipment, in new men and in added efficiency. The system, however, is one where improvement is necessary and where great results may well be accomplished.

POLICE DEPARTMENT.

The police department, as re-organized, is an efficient force for public safety and is now doing splendid work under the leadership of Chief John F. Welch.

HIGHWAY DEPARTMENT.

My re-organization of this department requiring as it did so much of my personal attention gave me a most advantageous knowledge of its work. Every citizen is aware of the great improvements in the way of street building, sidewalk construction and curbing. This constructive policy must be continued. We need more streets, more curbing, more sidewalks, and the old work needs repairing. We are building roads of a superior quality; we are laying granolithic sidewalks; we are doing away with concrete and brick, and I look forward to the time when every street in the city will be paved and properly constructed and from the Malden line, the Winchester line, the Arlington line and the Somerville line will be perfect roads, well curbed together with sidewalks fringed with beautiful trees, all well and thoroughly lighted with an up-to-date lighting system. I am not an enthusiastic believer of building majestic boulevards or driveways for the purpose of beautifying, or for automobile pleasure driving, but I do insist on good sidewalks, good drainage, and streets so constructed as to be a credit to our municipality, and I am certain from observation and experience that the valuation is greatly increased by the proper attention to these matters.

ELECTRIC WIRES AND GAS FITTING.

We have accomplished wonders in this department in the last year, placing many of our wires under-ground so that before this year passes into history, the telegraph and telephone poles will be removed from our main streets, and all wires will be placed in conduits. Our old and dangerous fire and police signal service has been rebuilt, and is now in a safe and efficient condition.

ASSESSING DEPARTMENT.

I am not yet satisfied with the policy of the assessors of the City of Medford. Two new members have been appointed and I hope that their year's experience will be a benefit to the city in obtaining for them a wider and deeper knowledge of values and that they will encourage the upbuilding of our city rather than discourage by endeavors to change valuations. There is still too much courtesy paid to the large property holder, and too little consideration paid to the poor and needy. I shall insist upon a fairer basis of valuation, which must show no favoritism or friendship, and must be free from personal interest or advantage. It is perhaps unfair to criticise a board so recently familiarized with its duties, for I have great hopes of their work in the right direction during this year.

In accordance with my policy for the selection of public officials the question of the appointment of the city collector, city treasurer and city auditor is one of the most pleasing duties I am called upon to perform. These men are thoroughly efficient, absolutely honest, always courteous, and I feel that Medford is indeed blessed in having in public office, men so well suited to fill their various positions.

GAS AND ELECTRICITY.

It is my intention, with the help of the board of aldermen, to compel a decrease in the price of gas for the City

of Medford. Nowhere in the Commonwealth of Massachusetts has such an unjustice been shown to the citizens of any city in the price of illumination under similar circumstances, and the condition demands action which must compel justice.

CITY PURCHASING AGENT.

After many months of hard and bitter contention, by the will of the people of the City of Medford, it has been made possible that we should appoint a purchasing agent for our benefit. Before such appointment can be made, however, it will be necessary to pass an ordinance defining the salary of the purchasing agent, and the limitations of his office. Inasmuch as the board of aldermen, just retiring, has seen fit to add in the neighborhood of \$10,000 to the salary list, I advocate with timidity an added salary which will increase appreciably our tax rate. However, at an early moment, I will ask the board to give this matter serious consideration.

SIXTH CLASS LICENSES.

For the first time in the history of Medford, we have taken a firm and decisive stand against the sale of intoxicating liquors within the confines of our city. Threats and promises were of no avail as against the desire of the board of aldermen to restrict what in many instances were little better than open, licensed bar-rooms under the name of drug stores. It is fair to say that most of the men in the drug business complied absolutely with the law and conducted legitimate business transactions. However, the city is now free of this blot upon the fair name of Medford and the privilege must never again be granted.

The citizens of the City of Medford have placed upon you the responsibility of co-operating with an administration which they have endorsed. It will be time for you to turn against the administration when the people who elected you advise you so to do. But harken well, lest you have listened to the voice of false prophets. The great, silent sentiment of our people is expressed at the polls, not on the street corners or in club rooms, and they have spoken in unqualified terms and their decision demands that you approach your duties in the spirit of firmness and earnestness and without personal prejudice or animosity.

There is a very much greater question involved than the success of our administration. Mayors may come and mayors may go, but Medford must go on forever. The individual is transitory and soon forgotten but those ideals and principles for which we stand must never die and must always be in the forefront of our endeavor.

You must work with me and fighting together, overcoming all obstructions, we will go onward and forward and make of Medford, that city of which our forefathers dreamed, one of the greatest, most beautiful, happy and contented, up-to-date, wide-awake cities in this grand, old Commonwealth.

To that end we are elected, and that good we must accomplish.

MEDFORD HISTORICAL SOCIETY.

Miscellaneous Bills.

All miscellaneous bills which are due to the several departments of the City (except the Cemetery Department) are first sent to the City Auditor's office where they are recorded, numbered and sent to the party designated, and a credit memorandum of the items is given to the City Collector.

The books of this Department show the amounts remaining uncollected Jan. 1, 1917, to have been for the following accounts:

General repairs of Highways	\$ 601	69
Trees	3	00
General Expenses—School Dept	387	00
Outside Relief	1,201	34
Contagious Diseases	493	17
Sewer Maintenance	50	35
Sewer Construction	107	58
Watering Streets	8	70
Gypsy and Brown Tail Moths	13	69
Sidewalks and Edgestones	42	04
Surface Drains	8	50
Almshouse	53	5 8
Ashes	240	0 0
Income from Estates taken for taxes	22	50
Miscellaneous Credits	59	78
Collection of House Offal	80 0	00
Infantile Paralysis	32	00
Engineering Dept. Expenses	1	44

\$4,126 36

SCHEDULE C.

Of the Commonwealth of Massachusetts Bureau of Statistics.

Statement of Debt, Jan. 1, 1917.

Deduct amount of debt paid in 1916		
		-

\$426,150 00

Bonds amounting to \$35,800.00 have been authorized but have not been issued.

Valuation and Limit of Taxation.

Section 19, Chapter 719, Acts of 1913, provides that, whereas the Board of Aldermen of Medford having by Ordinance fixed in 1913 the tax limit at \$12.75 "on every \$1,000 of the average of the Assessors' valuation of the taxable property therein for the preceding three years, such valuation being first reduced by the amount of all abatements allowed thereon previous to the thirty-first day of December in the year preceding said assessment."

The Net valuation of the City of Medford for 1914 was The Net valuation of the City of Medford for 1915 was The Net valuation of the City of Medford for 1916 was	\$29,695,500 31,249,125 32,702,750	
	3)\$93,647,375	
Average valuation	\$31,215,791 12.75	66
	156078955 218510537 62431582 31215791	
Assessed at \$12.75 per \$1,000 gives \$	398,001 33	

This is the legal limit of taxation "exclusive of the state tax and other amounts assessed upon the city by the Commonwealth, the County tax and sums required by law to be raised on account of the city debt."

Borrowing Capacity.

Section 12, Chapter 719, Acts of 1913 limits the indebtedness to $2\frac{1}{2}$ per cent. of the average valuation for the three preceding years.

In compliance with the provisions of Section 12 of . Chapter 27 of the Revised Laws and Section 8 of Chapter 6 of the City Ordinances, the Commissioners find the amounts to be raised the coming year for the Sinking Funds are as follows:

Sewerage\$	3,820	00
Metropolitan Park	180	00
Lincoln School	1,500	Q0
City Stables	320	00
Schoolhouse Improvement	500	00
Schoolhouse of 1908	3,000	00
City Notes	5,600	00
Total\$	L4,920	00

And the Commissioners have certified to the City Auditor that this amount of \$14,920.00 is required to be raised by taxation for the Sinking Funds, and is to be put into the yearly appropriation for the ensuing year.

Respectfully submitted,

1913,	259	persons	at	a	eost	of		3 03
1914,	405	persons	at	a	cost	of	10,764	80
1915,	526	persons	at	a	cost	of		41
1916,	488	persons	at	a	cost	of	12,712	74
Net co	ost o	f City H	om	e.		• • • •	4,189	55
Net c	ost o	of Outsid	le]	Re	lief.		8,874	31

The recommendations of the Overseers of the Poor for the year 1917 are as follows:

The net cost of Outside Relief for 1916 was \$8,874.31, fifty per cent. of which is for the support of mothers with dependent children and is bound to increase from year to year. We therefore feel that \$9,500 is a very fair estimate for this branch of our department for 1917.

The net cost of the City Home for 1916 was \$4,189.55 and as all food stuffs and commodities have materially increased in price, we feel that \$4,500 will be required.

There is need of a poultry house and general repairs which require at least \$500.

Summary:

City Home	\$4,500	00
And all money received for board of inmates		
and sale of products of the farm.		
City Home Repair	500	00
Outside Relief	9,500	00
And all money received from the State and		
Cities and Towns for aid rendered.		
Salaries of Overseers and Secretary	950	00

Respectfully submitted,

GEORGE SMARDON,

JOHN W. ROCKWELL,

Overseers of the Poor.

Report of the Inspector of Buildings

Medford, Mass., Jan. 15, 1917. Tarrest to the section of the sectio

To His Honor, Benjamin F. Haines, o His Honor, Denjument Mayor of Medford.

Dear Sir:

As required by the City Charter, I submit the annual report for the past year.

The whole number of applications for building permits has been six hundred and fifty-six (656). The estimated cost of this work was two million, one hundred ten thousand, five hundred thirty dollars (\$2,110,530). As the work has progressed, it has been carefully inspected and a fair and reasonable compliance with the building ordinances has been required in every case.

Of the permits issued

274 permits were for two-family dwellings.

171 permits were for one-family dwellings.

108 permits were for garages.

16 permits were for stores.

5 permits were for repairs after fires.

2 permits were for schoolhouses,

and the remainder (80) were permits for additions and general repairs.

Permits by Wards.

Ward 1		63	permits.
			-
		122	
Ward 4		70	,,
		152	
Ward 6		118	
Ward 7		61	. ,,
Tota	al	656	permits.

Permits by		
Months.	No. Permits.	Cost.
January	10 *** \$	20,500 00
February	23	112,800 00
March	53	165,640 00
April		328,250 00
May		168,415 00
June	59	179,080 00
July	50	134,075 00
		152,455 00
August	∴ 70	191,405 00
October	82	208,100 00
November	41	315,810 00
December	39	134,000 00
	656 \$5	2,110,530 00

Recommendations.

It will be necessary, the coming year, to have some new ordinances printed, and as there are several different kinds of material in the market now used for the construction of buildings which are not defined in the ordinances as they are now, I would recommend that there be ordinances passed

for the construction of buildings of Hollow Tile and other such materials. There should also be some ordinances for the construction of Garages. Also there are several changes needed in the Building Ordinances as written to bring them up to date.

I would recommend that there be four hundred dollars (\$400) appropriated for general expense for this department for the coming year, and one hundred dollars (\$100) for printing new ordinances, as there are none on hand at present.

Yours very truly,

FRANK B. BLODGETT,
Building Inspector.

MEDFORD HISTORICAL SOCIETY.

Report of the Superintendent of Wires and Gas Fitting

Medford, Mass., January 1, 1917.

Hon. Benjamin F. Haines,
Mayor of the City of Medford.

Dear Sir :--

I have the honor of submitting to you the ninth annual report of the Department of Wires and Gas Fitting, Fire and Police Signals and Street Lights for the year ending December 31, 1916.

Police Signal System.

This year the working apparatus at the Police Station has had a thorough overhauling at the Gamewell Fire and Police Signal Co. factory and is in very good working order, also the underground rubber-covered wire has been replaced by lead sheath wires.

Fire Alarm Signal System.

The working apparatus of the Fire Alarm system which has been doing duty for a great number of years is in a poor and worn out condition, especially the repeater. This apparatus should be replaced with approved and up to date equipment.

Street Lighting.

During the year there have been added 56, 40 C. P.,

lamps at \$15.00 per year; 7, 200 C. P. lamps at \$60.00 per year. At present there are 202½, 200 C. P. lamps, burning from dusk until daylight at \$60.00 per year; 794, 40 C. P. lamps, burning from dusk until midnight at \$15.00 per year; 17, 200 C. P. lamps, burning from dusk until midnight at \$43.80 per year.

Very respectfully submitted,

EDWIN D. CURRAN,

City Messenger.

Report of the City Clerk

Medford, January 8, 1917.

To the Honorable, the Mayor, and the Board of Aldermen:

Gentlemen :--

The following is respectfully submitted as the annual report of the City Clerk's Department for the year ending Dec. 31, 1916:

The office was occupied by Mr. Charles H. Loomis from January 10th to Dec. 29th, 1916, and the following data is as I find it from the records now on file and is to the best of my knowledge and belief true.

The Board of Aldermen held 26 regular and 10 special meetings.

Number of marriage intentions filed, 351.

Number of deaths reported for 1916 to date were 451. It is possible that some out of town reports of 1916 deaths may be received subsequent to this date.

General Increase.

The work required of the department this year has been more than ever, partially on account of new development but principally owing to the propressive action of the administration in forwarding a great amount of new street construction, edgestone and sidewalk installation, surface drains and miscellaneous work connected therewith.

By direction of the Board of Aldermen, surveys, plans, profiles, registry examinations, and descriptions have been take of ten private streets for acceptance as follows:

Street	From	То
Powdoin Street	Main Street	Dartmouth Street
Bowen Avenue	Main Street	Willis Avenue
Barnside Street	Lawrence Street	Central Avenue
Ourt Street	Tainter Street North- erly	
'llis Avenue	Main Street	Park Avenue
Pyans Street	Central Avenue	Lawrence Street
Parvard Street	Main Street	Willis Avenue
Lilgore Avenue	High Street	Mystic Valley Pkwy.
lewis Street	Fulton Street	Court Street
Cole Street	Central Ave. South- erly 598 feet	

In addition to these, a plan of Fulton Spring Road furrished by the abuttors has been referred to this department for examination and approval and for which a survey has been made, the plan corrected and returned to the Board together with a correct description; a plan and description for the relocation of the westerly side of Winthrop Street from Capen Street to the Somerville Line has been made; also a plan has been made by this department for the layout of a new street from the angle of Hancock Avenue to Mystic Avenue.

The following streets have been accepted:

Street	From	To	Date
Bowdoin Street	Main Street	Dartmouth Street	August 2, 1916.
Bowen Avenue	Main Street	Willis Avenue	August 2, 1916.
Bradbury Avenue Burnside Street Court Street	Riverside Avenue	Fellsway	August 16, 1916.
	Lawrence Street	Central Avenue	August 2, 1916.
	Tainter Street North-		December 30, 191
Ellis Avenue	Main Street	Park Avenue	August 2, 1916.
Harvard Street	Main Street	Willis Avenue	August 2, 1916.
Lewis Street	Fulton Street	Court Street	August 16, 1916.
Pinkert Street	Myrtle Street	Lawrence Street	August 11, 1916.
Second Street	Fellsway	Bradbury Avenue	August 16, 1916.
Relocation of Win- throp Street	Capen Street	Somerville Line	December 30, 191

Estimates for construction of roadway, installation of edgestone, sidewalks and surface drains have been made, and surveys and stakings together with sketches and grade sheets for the use of the Highway Department for the construction of the same have been made as per the following list:

•		43905	10289	48484	7575

In addition to these, a large number of estimates have been made for construction of similar work, for which the appropriations have not yet been made.

In Appendix A will be found a schedule of edgestone and the sidewalks built during the year.

In Appendix B will be found a schedule showing a list of streets on which sewers have been constructed during the year, together with their lengths, sizes, etc.

In Appendix C will be found a list of the surface water drains, together with the eatch basins and other appurtenances constructed during the year.

In Appendix D will be found a schedule of macadam roadway constructed during the year.

Street Watering.

The usual measurements of frontages have been made, amounting to 437,714 feet or 82.90 miles. The length of streets watered is about 48.09 miles; the area watered is about 799.813 square yards.

The rate is four cents per front foot.

Sewer Construction.

Five thousand nine hundred sixty-three feet of sanitary sewers have been built during the year, all done by Municipal labor.

The following table shows the total lengths and sizes of sewers on January 1, 1917:

5-inch vitrified pipe sewer		97.0
6-inch vitrified pipe sewer		14.539.5
8-inch vitrified pipe sewer		269,691.4
8-inch cast iron pipe sewe	er	215.0
10-inch vitrified pipe sewer		25,599.9
12-inch vitrified pipe sewer		13.532.2
15-inch vitrified pipe sewer		9,573.8
18-inch vitrified pipe sewer		6,968.2
20-inch vitrified pipe sewer		4,181.0
or 65.207 miles.		

For this work preliminary plans and estimates have been made, lines and grades given for construction and Y tocations obtained while the work was in progress. Releases on private ways have been obtained and all necessary papers for releases and takings have been made.

School Department.

This department has made surveys, plans, estimates and superintended the construction of the grounds, walks and surface drains of the Hancock Avenue School, also has made surveys, plans and descriptions for the taking of land for the Junior High School.

City Hall.

Surveys, levels and plans have been made for the takings for the new City Hall and stakings and levels have been given for the construction of the City Hall.

Water Construction.

There has been constructed during the year eleven thousand, one hundred twenty-four feet of new mains and eleven hundred forty-four feet of renewals with the necessary specials, hydrants, etc., for which locations have been given and all necessary measurements have been made for the purpose of making record plans of the same.

Office.

The indexing of plans, survey and level notes, calculations and construction records, etc., has been continued so that there are 38,000 typewritten cards.

Lines and grades for streets for guidance in erection of fences, grading of lawns and building operations have been given to 36 applicants.

Plans, estimates and sketches have been given to the various departments when requested.

Committee meetings of the Board of Aldermen have been attended when requested and such information as required, given.

Plans and estimates have been furnished committees of the Board of Aldermen, and members of the Board as required; also information has been furnished to the citizens and their agents so far as the records of the office permit.

In Appendix E will be found a general inventory of the office property.

City Map.

The City Map consists in part of 24 sheets of 60-inch wide mounted leonine paper of varying lengths, upon which is plotted on a scale of 40 feet to the inch, the entire city, excepting that portion lying northerly from a line between Oak Grove Cemetery and the southerly line of Murray street. Owing to constant and long continued use several of these sections are badly worn and should be renewed at once, but as the appropriation for the department barely covers the cost of current work, it is necessarily difficult to find sufficient funds to earry out this much needed work.

In addition to the above, there are two maps of mounted leonine paper covering the entire city, on a scale of 200 feet to the inch; also one map 400 feet to the inch, covering the entire city and mounted as above.

Oak Grove Cemetery.

At the present time there is no map showing the cemetery as a whole, the existing plans being mostly on small sheets of various scales and made by different engineers; and as we do not have their field notes, it is practically impossible to connect the separate parcels into one complete and accurate map.

Staking and grade sheets were made for a new road from Hillside Avenue to Playstead Road.

Recommendations.

The appropriation of money each year to set stone

bounds so that the location of street lines may be permanently established. Owing to decay and destruction of natural monuments this becomes more essential each year.

The building of a new bridge over the Mystic River at Winthrop street. Preliminary plans for this bridge and watercolor sketch showing the character of the same have been made by this department.

A complete survey of the old portion of Oak Grove Cemetery and a plan of the entire cemetery.

The construction of a covered drain for the waters of Whitmore Brook from Playstead Road to High street and from the Hose House lot to the easterly line of Prescott street; and the reconstruction of the culverts at Irving, Warren and Prescott stretes.

The extension of the conduit at Winter Brook, from Tufts Square northerly.

Conduit for the storm water in Two-Penny Brook. The land now used for storage is being developed into house lots.

Setting edgestones and building permanent sidewalks on accepted streets where the property is so built up that there will be slight necessity of tearing up sidewalks for new construction.

Respectfully submitted,

FRED R. CHARNOCK,

City Engineer.

HERBERT B. LYNDE,

Medford Board of Assessors.

MEDFORD HISTORICAL SOCIETY

Report of the City Treasurer

Medford, January 1st, 1917.

Hon. Benjamin F. Haines,

Mayor of the City of Medford.

Dear Sir :-

As required by Section 31 of the Revised Charter, I herewith submit the following report:

Cash in Treasury, January 1, 1916	•	
Expenditures to December 31, 1916	\$2,062,620 1,863,766	
Cash in Treasury, January 1, 1917	\$ 198,853	73

Respectfully submitted,

EDWARD A. BADGER,

City Treasurer.

Report of the City Planning Board of Medford for 1916

To His Honor the Mayor and Board of Aldermen of Medford, Mass.:

The present Planning Board of Medford was organized March 16, 1916, with T. P. Higgins as chairman, and A. C. Mangels, secretary.

During the year, the Board has held fourteen meetings. Early in the year the Mayor addressed the Board and expressed his ideas of what he thought were the duties of a Planning Board and promised his co-operation.

The first part of April, the Board made a tour of inspection of the whole city making special inspection of possible improvements of the section between the car barns, Fellsway West and junction of Salem and Spring Streets, with a view of opening up an extension of Spring Street to Fellsway West.

Building lines were the next thing the Board turned its attention to. This subject has been gone over thoroughly by the Board and they recommend some action be taken by the Board of Aldermen the early part of the coming year.

The Metropolitan Park Commission was asked to clean up its property bordering on the Mystic River, with good results.

Efforts were made to have the marsh lands of the Mystic Estate drained by lowering the drain under Main Street.

At the request of the Mayor, the Planning Board was asked as to the advisability of a Fire Station in Wellington. After deliberation, the Board recommended a site which

REPORT OF CITY PLANNING BOARD

would cover both the Glenwood and Wellington Districts, at the northwesterly corner of Spring Street, corner of Riverside Avenue.

Matters of much importance of benefit to Medford were taken up with the Fire Prevention Commission and still other matters must be looked after to insure against fire hazards in this city.

Henry Sterling, secretary of the Homestead Commission, has addressed the Board at their invitation on the duties of Planning Boards and the best methods of being useful to the city at large. He also outlined the duties of the proposed Board of Survey in a very clear manner. This Board would act in conjunction with planning boards.

It is to be deplored that Medford was not represented at the Springfield Convention of Planning Boards, but lack of funds caused by large municipal improvements prevented an appropriation for it.

The Planning Board is ready at all times to listen to suggestions of the citizens of Medford to further the interests of Medford.

We recommend an appropriation of \$200 to be expended for the services of clerk hire, stationery, etc., securing maps and whatever else may be necessary to enable us to properly conduct the work of a Planning Board.

We feel that with the co-operation of the city officials much can be done to make a better Medford.

Respectfully submitted,

ANDREW C. MANGELS,

Secretary.

THOMAS P. HIGGINS, Chairman, ANDREW C. MANGELS, G. A. McCORMACK, E. W. COBB, E. C. ELLIS.

Report of the Sealer of Weights and Measures

Medford, January 1, 1917.

Ilon. Benjamin F. Haines,
Mayor of Medford.

Dear Sir :--

I have the honor to submit to you my thirteenth annual report of the Weights and Measures Department, of the City of Medford, for the year ending December 31, 1916.

More than ordinary attention has been given to the weighing of coal in transit, both from the city dealers and those delivering coal from out of town plants, with excellent results.

Bags of coal in stores have also been tested and found to be up to the required (25 lbs.) weight.

lee deliveries have from time to time been followed up, and perhaps less complaint for shortage has been heard than in any previous years, general satisfaction being the result.

All food commodities are required by Federal Law to be marked in plain figures with the net weight or capacity of contents.

Hundreds of inspections have been made in stores and in no case has this law been found violated; perhaps with the single exception of bread, during the early summer, which in several cases was found improperly marked and of light weight. These eases were taken to the State Commissioner and today I believe that the laws in this respect are universally conformed to through the action of the State Commissioners who caused to be purchased over 10,000 loaves of bread throughout the state, and notifications sent to all dealers where a shortage was found.

There are certain articles of food in packages, such as sliced dried beef, sliced bacon and butter that, caused by shrinkage, may not have the proper weight. Butter that complies with the Pure Food Law will contain about 16 per cent. of moisture. The age of butter and the condition under which it is kept tends to make the shrinkage more or less, which will average 1-8 to 3-4 of an ounce on a given pound in the ratio of age and condition. On the articles which evaporate to a given degree, the evaporation is nothing but moisture and the food value of the commodity is absolutely unaffected—so that the spirit and intention of honest weighing and measuring is one that should be considered just as seriously as the technical interpretation of the law in its application to different commodities.

With the constant increasing cost of gasoline and the

200

large number of automatic measuring pumps in this city, thorough inspection and testing the reliability of the measurements of the capacity of the same has repeatedly been made by this department—61 gave correct measurements, 37 from 2 oz. to 1 pint short and 40 from 4 oz. to 1 pint over. Corrections were made in all cases possible and others condemned or tagged for repairs. The older pumps are more than liable to give incorrect measure and need constant watching, while the more modern pumps, when once properly installed and adjusted, hold their own remarkably well, but all are kept under constant supervision.

During the past year, a 20-ton city (public) scale has been installed at the city yard, which may be made use of at all times for heavy weighing. As it is over ten years since the city has had this public convenience, it is hoped that it will be appreciated and general use made of the same.

A "Public Weigher," for which the city charter provides, should be appointed and an ordinance passed designating the amount of tariff to be collected for use of said scales.

I believe there has been wonderful improvement in the adaptation and use of weighing and measuring devices during the past few years in this city, not only in the passing of the many new laws that redound to the benefit of the buyer and the seller, but the more general enforcement of the older laws that have been on the statutes many years with seant observance.

While you cannot make a man honest by legislative enactment, he is, however, compelled to take cognizance of the law: and that recognition exerts a restraining influence, perhaps greater than some purely reform movements of the day, for the weight and measure law preaches the gospel of truth and honesty and then makes the gospel practical by preventing lying about quality and stealing in quantity.

The new legislation enacted during the past year, as: well as the extended rulings and instructions from the StateCommissioner, tending to protect the purchaser against short weights and measures, has materially increased the work and expense of the sealer during the past year, and still more apparatus should be purchased, in the near future, for the proper equipment of this office.

For the purpose of carrying on the work of this depart ment for the ensuing year, I would respectfully recommend the sum of four hundred dollars (\$400) be appropriated.

Respectfully submitted,

WINSLOW JOYCE,

Sealer of Weights and Measures.

Report of the Park Commissioners

Medford, Mass., January 1, 1917.

To His Honor, Benjamin F. Haines,

Mayor of the City of Medford.

Sir:-

The Board of Park Commissioners herewith presents its twenty-fourth Annual Report for the year ending December 31st, 1916.

The work for the year began April 17th and general maintenance continued until December 18th.

The season unusually wet prevented somewhat the work being handled by the workmen as systematically and economically as was desired. Three men were employed at the beginning and eleven men during the busiest part of the season under Mr. Biggs, the foreman.

In spite of the unpropitious weather it is the opinion of the Commission that the playgrounds were never so well cared for and certainly they have never been more used by our citizens than during the year just closed. The parks have been kept clean and as far as possible in good condition; there is needed, however, new planting to replace old and damaged shrubbery, and more thorough spraying for the San Jose scale. This and certain minor improvements that had been planned for and fertilizing have had to be omitted owing to lack of funds. Playgrounds are of the first importance; the parks, however, should not be neglected, but so planted and cared for as to develop their natural beauty and attractiveness from year to year.

One of the reasons for the increased use of the play-

MEDFORD HISTORICAL SOCIETY.

ac. 28/4.

REPORT OF THE PARK COMMISSIONERS

grounds by the younger portion of the community has been the installation of playground apparatus made possible by an appropriation of \$2,500 on request of the Commission on June 1st, acted upon by the Board of Aldermen on June 27th and approved by your Honor the 29th of June. Bids were advertised for and upon their receipt and due consideration the contract was awarded to the Iver Johnson Sporting Goods Company of Boston to supply and erect three swings, two see saw sets of two teeter boards each and a sixteen-foot maple slide for each of the four playgrounds: Brooks Playstead, Morrison Playground, Summer Street Playground and Tufts Park Playground.

The apparatus was of A. G. Spaulding & Brothers manufacture of galvanized steel construction and erected on a concrete foundation. So eagerly was opportunity sought by the younger children to use the apparatus that there were always many more than could be accommodated on the playgrounds and the Commission plans to add more of the small swings the coming year with the balance of the appropriation remaining.

Objection to the noise attended on the use of the apparatus on the Playgrounds was made by people adjacent to the Playstead owing to the necessity of locating the apparatus near the street, but for the safety of the children, as this Playground is bounded by the railroad and farming lands on the west and north its entire length, as well as owing to its general character it was felt the location was the proper one. A hearing was granted the objectors by your Honor and the Commission and as a result such modifications as to location as was possible were made and as soon as a proper arrangement can be made to care for the brook flowing through the land and a re-grading made dependent upon a sufficient appropriation a still better arrangement is planned for.

Having installed the long and much desired apparatuson the playgrounds the Board is now faced with the necessity to properly provide for instruction as to its proper use and the protection of the children.

263

Much time and thought have been given by the members of the Commission, especially by Mr. Herman L. Buss, who had been requested by the Commission to take up this work in detail as to methods in use by other cities and towns in the State, that he might assist the Commission in adopting a proper scheme for Medford's use.

The fact developed that almost every city and town had a method of its own that had been worked out according to its own needs; some were quite expensive, others moderate.

After due consideration it was decided to recommend that the grounds should be under supervision for six months of the year and that to provide instruction and care for the children a woman instructor at each of the playgrounds would be required and a man to have general charge and superintendence of the work. The women instructors should be those who had had proper kindergarten training and possess the physical and mental qualifications required by this work. Regarding the male superintendent it is understood that the services of the new athletic instructor at the High School, who has the training and qualifications desired, could be employed. This would be an excellent arrangement as the school and playground work are closely associated in many ways.

this work and will ask for an appropriation this year as the need is imperative both for the protection of the children and a proper use of apparatus. In reference to the use of the playgrounds, the question has been presented as to whether they should remain open for use by the children on Sundays, the Commission has ascertained that it is customary in some cities and towns to do so believing that the children are much better off with minds and bodies engaged in healthful exercise in good surroundings than in loafing and idling their time away in the city street, others steadfastly adhere to the spirit of the forefathers and the Blue Laws. This would seem to be a matter for our citizens to determine for themselves and this question undoubtedly will

be presented for official consideration and action in the near future. As your Honor knows, matters pertaining to the socalled Blue Laws have never been fully considered or acted upon by our Legislature. At the present session many matters are under consideration with an indication of more liberal views prevailing at this time than in the past.

As suggested by the Commission in last year's report and approved by your Honor, the office of Park Superintendent was created by vote of the Commission under date of April 11th.

This was done that the plans and instructions of the Commission could more properly be carried out and a better supervision of the work and employees given in the interest of efficiency and economy. The Commission appointed Edward P. Adams for the term of one year.

The attention of your Honor is called to the fact that the work on Tufts Park and Playground has never been completed as planned. In fact, no new shrubbery was added when the grounds were enlarged and some of the old has since been damaged or destroyed. In view of the unsightly appearence now made by this neglect the Commission suggests a special appropriation for completing the planting in the spring. The Superintendent states that the work could be accomplished for three hundred dollars.

Last year the Board of Aldermen recommended and passed an order for the purchase of land for a playground in Ward Two, this being in a section as yet unprovided with playground facilities. Your Honor felt obliged to veto this appropriation on account of the financial condition prevailing at the time. It is hoped that within a short time money will be provided for this purpose owing to the great need of this section for a playground. If other sections not now provided for are to be considered, the sooner arrangements are made for the acquiring of land the better will be the opportunity to acquire a proper location at a reasonable price.

One of the immediate needs of the playgrounds is the supplying of them with water for drinking and other uses. Morrison Playground has already been cared for and as the

Water Department has been furnished location plans by the Commission it is hoped this year will see all the playgrounds properly provided for.

During the present season an attempt has been made to provide for the need of skating accommodations for the smaller children by surrounding level areas on the playgrounds with low dams of loam; these were flooded by the Fire Department on request of your Honor. It is claimed that this plan has been fairly successful, but not until the end of the cold weather will the Commission be able to decide as to its practicability or if the results are sufficiently satisfactory to warrant a continuance in view of the expenses.

The pruning of the trees and shubbery has received careful attention as well as the work in the fall for such trees as had suffered attack from the leopard moth.

The Commission was enabled to do much of this work with its own employees under competent instruction, thus serving a double purpose, the teaching of the regular force for future benefit and the saving in the cost of the work. The thanks of the Commission are due to Commissioner Arthur W. Crockford for his contribution of flowering plants for bedding purposes at Morrison's Playground as well as for his care and superintendence of the grounds during the summer season.

The past summer the bath-houses have not been opened to the public owing to the pollution of the Mystic River. The Board of Health ordered them closed and as yet has given the Commission no authority to re-open them. The people still continue to bathe in the river and if they are allowed to do so it would seem as if the bath-houses should be opened, providing responsibility is not incurred by the city is so doing. An appropriation will be asked for this purpose the coming year. In connection with the pollution of the Mystic River, it is of interest to note what the Metropolitan Park Commission states in this year's report:

"In 1915, by Chapter 249 of the Special Acts of that year, appropriation was made from the Metropolitan Parks

Maintenance Fund to provide for improving the sanitary condition of the Aberjona River through lands of Mystic Valley Parkway in the Town of Winchester. This appropriation has been expended and the further sum of \$5,000 is necessary to complete the work."

Until this work is completed Medford has an added menace to those already confronting her as was specifically treated in the Commission's Annual Report to the Mayor in 1913—and your Honor is referred to this report as especially of interest at this time when it would seem as if great effort should be made by our City Officials together with our Representatives in the Legislature for immediate action on this matter of the Mystic River pollution. This is a menace of far greater proportion than seems to be realized.

The Metropolitan Commission dealt with two other matters of interest to Medford. Of the Wellington Bridge approach it states that:

"The easterly road of Middlesex Fells Parkway from Middlesex Avenue in Somerville across Wellington Bridge to its continuation in Medford beyond Revere Beach Parkway was a highway before it was included in, and made a part of, Wellington Bridge and approaches for use as a roadway of the Middlesex Fells Parkway. It has to provide for an extraordinary volume of heavy traffic as well as parkway travel. The portion in Somerville has been rebuilt with concrete surface by the Massachusetts Highway Commission. An extension of this construction over the part in care of this Board seems to be the only way to insure a good surface and bring the cost of maintenance within reasonable rights. An appropriation of \$21,000 against the Wellington Bridge Maintenance Fund will be required for this purpose."

It further states relating to the Mystic Valley Parkway completion that:—

"By Chapter 186 of the General Acts of 1916, a portion of the money necessary for an extension of Mystic Valley Parkway in Arlington around the southerly end of Mystic Lake, to a connection with the state highway to Lexington and Lowell, under construction was appropriated. A further appropriation of \$25,000 is required for completion of construction and for acquirement of a piece of land required for re-location of service buildings which will have to be removed to make way for the extension."

The increase of the pay from \$2.25 to \$2.50 per day of the park employees as authorized by the city together with the granting of a half holiday on Saturdays the entire year will increase the cost of maintenance about one thousand dollars.

The Superintendent's salary has been increased from three hundred to five hundred dollars and the Clerk from one hundred to two hundred dollars and the Foreman's salary from two dollars and seventy-five cents to three dollars per day. These increases in the cost of labor account for practically all the additional appropriation asked for this year. Money is needed for important work that has already been too long delayed, but the Commission feels under the prevailing conditions they should not ask for more at this time.

For the year 1916 the Commission received by appropriation and transfer the sum of \$4,007.50 and expended as follows:

Public Commons Account.

Pay rolls	\$2,772	48
Supervision and clerk's salary	350	00
Repairs and painting	177	52
Pruning and spraying	366	18
Loam	123	75
Fertilizer	24	00
Supplies	37	80
Lawn mowers and repairs	91	45
Grass seed	4	20
Telephone and incidentals	35	55
Total expenditure	\$3,982	93

The following appropriation is recommended for the use of the park and playgrounds department for the ensuing year:

1.	Public Commons including Playgrounds	\$5,500	00
2.	Bath Houses	500	00
3.	Supervision of Playgrounds	2,800	00
	_		
	Total	ቀ6 600	ΛΛ

The complete report of Mr. Edward P. Adams, Park Superintendent, for the year is appended.

Respectfully submitted,
WILTON B. FAY,
IRWIN O. WRIGHT,
DANIEL W. BEDELL,
- HERMAN L. BUSS,
ARTHUR W. CROCKFORD,
Park Commissioners.

Report of Landscape Architect and Engineer.

January 1, 1917.

Hon. Wilton B. Fay,

Chairman of Park Commission, City of Medford. Sir:

I respectfully submit the following report of park work, for the year 1916:

The regular park work began April 17 and closed De-

cember 18. The summer, like that of 1915, was unusually wet, and consequently lawn mowing required the major part of the park appropriations. This year for the first time the new playgrounds as well as the parks were kept neatly mowed throughout the growing season. By the generosity of Mr. Crockford and his careful attention during the summer, bedded plants added delightful color along the Central Avenue front of Morrison Playground. Contrary to predictions, these plants were very little molested by the boys.

A special appropriation for playground equipment enabled us to complete the apparatus needful for baseball and football at the new playgrounds, by the construction of a wood and netting backstop at Summer Street playground, tubular steel foul posts and rubber home plates on well tarred cypress frames at that playground and at Tufts Park Playground, also improving the diamonds by working in screened loam, constructing one more set of goal posts, etaking out and marking all the football fields. Sand boxes and park seats were built by contract.

After receiving bids from the three largest manufacturers of playground apparatus in the United States, and visiting the municipal playgrounds of nearby cities and towns to see various makes of playground apparatus in use, the contract was awarded to Iver Johnson Sporting Goods Co. of Boston for galvanized steel-framed apparatus of A. G. Spaulding & Bros. manufacture to be erected by them in the four main playgrounds in the City: Brooks Playstead at West Medford, Morrison Playground on Central Avenue, Summer Street Playground, and Tufts Park Playground on Morton Avenue near Tufts Square.

After many delays in delivery, the apparatus was completely erected and accepted October 16th. The apparatus comprises three swings, two see-saw sets of two teeter boards each and a sixteen-foot maple slide, all on galvanized steel frames, at each of the four playgrounds.

After removal of goal posts the first of December, advantage was taken of an opportunity to buy exceptionally fine loam at a low price for spreading where especially

needed in the spring; and this loam was temporarily used to make low level-topped dams surrounding level areas at three of the playgrounds, to afford safe skating places for the smaller boys and girls during favorable weather in the winter. Favorable weather came the last week of December, and the young folks in large numbers enjoyed the skating thus easily prepared for them.

At Hastings Heights some of the loam was spread, and manure spread over it. But the snowstorm of December 15th interrupted this work and closed the park work for this year.

The swings, teeterboards, slides with steps, and the goal posts were removed before the snowstorm, and with the two horse mowers were stored for the winter in a section of one of the buildings at the City stables.

In September and October the trees in all the City parks and playgrounds were treated for leopard moth borers and all dead branches removed. In November and December the shrubs in Magoun Park and Brooks Park were thoroughly pruned; and in Logan Grove, Tufts Park, and Hastings Heights the most needful part of the pruning of shrubs was done by the regular park men under competent supervision. A part of the gypsy moth work required was done by the park men at the same time. Before spring opens the pruning and the gypsy moth work should be completed.

A service pipe at every playground for a drinking fountain, as well as for a flush hydrant to which a hose can be attached, was recommended in last year's report. Location plans were made and delivered to the water department in the summer. The service pipe at Morrison Playground has been laid.

In accordance with the order of the Board of Health, the bath-houses on Foster Court were not opened to the public in 1916. Consequently the doors were broken open, other mischief done, and extensive repairs required. When repairs were made, the inner doorways were boarded up to make forced entrance more difficult.

A few minor repairs are now needed. As it is hoped

that the condition of Mystic River in the neighborhood of the bath-houses will be so much improved by next summer that the bath-houses can be opened to the public, a floor should be laid in the men's and boys' bath-house.

Nearly all the men employed this year were especially good workmen, Mr. Biggs and Mr. Ingraham being also good mechanics, and to this fact it is largely due that so much was accomplished. The new McCormick one-horse 4-ft. cut mowing machine greatly reduced the cost of grass cutting since its purchase the first of August.

I should like to call attention again to the recommendations contained in my report last year.

Respectfully submitted,

EDWARD P. ADAMS,

Superintendent of Parks and Playgrounds.

Recommendations from Report of Park Work for the Year 1915.

A general program and allowance for the whole year for pruning and spraying shrubbery in all the parks, so that the work can be done at the best times and wherever found to be needed without any delay. Often a few days' delay has seriously handicapped this kind of work. I advise an allowance of \$200 for this pruning and the proper supervision of it, and \$50 additional for the spraying of shrubbery. By this arrangement a large part of the work can be done by the regular park men under competent supervision.

The treatment of the trees for leopard moth and elm tree beetle cannot so well be done by the regular park force;

and the treatment by experts adopted in 1913 appears to be the best. The uncertainty of the amount of work to be required precludes an estimate at the beginning of the year. But if the trees are to be saved this work ought to be properly and completely done in August of every year.

The general park work should begin the week before Easter and continue with sufficient force to keep up with the work until the ground freezes in December.

If arrangements are to be made for skating on the playgrounds, low dams of good black loam should be built the first week in December around every area to be flooded. This work of building dams will then cost less than when done with the ground frozen, and will be made more effective.

A service pipe for a drinking fountain as well as for a flush hydrant to which a hose can be attached should be laid this coming year at every playground.

Some provision should be made for the storage of tools at Tufts Park. The tool house at Magoun Park, the bandstand on the Common and the tower at Hastings Heights provide for the other sections of the City.

For years there has been a lack of proper addition of fertilizers on the lawns and shrubbery beds of the City parks. It would be difficult to get well-rotted manure when wanted. The park department should have a good place for a compost heap to which leaves as well as manure could be added and forked over a good many times before being used. For this purpose leased land would be best, because it should not be near dwellings and yet should be as conveniently located for park use as is possible.

The same land might be used as a temporary nursery for trees and shrubs to obtain larger plants for replacing, without delay, trees and shrubs that die.

Respectfully submitted,

EDWARD P. ADAMS.

Mospital, but having been notified by the superintendent of that institution that no more Medford cases were wanted, the Overseers of the Poor withdrew their patronage, without reluctance, bearing in mind the treatment accorded the flast patient they sent there. The patient in question on the second day after his admission was returned to his home by the superintendent, assisted by the city physician of Malden, without notifying either the Overseers or his family, with the result that the patient had to remain out-of-doors until his wife got back from work.

The inmates of the City Home have been looked after in the most painstaking and conscientious way. The matron that nursed many of them through protracted periods of sickness. So faithful has she been to the sick that she devoted many hours, even during the night, to bedside watching and nursing.

The Accident Room at the Police Station has been kept in a neat and orderly manner and it is well supplied for emergency work. The police throughout the year have been kind and helpful to the injured sick, many of whom were victims of cars and automobiles.

Very respectfully,

E. W. BARRETT, M.D.,

City Physician.

Report of the City Physician

Hon. Benjamin F. Haines,

Mayor of Medford.

Dear Sir:

The report of the City Physician for the year 1916 is herewith respectfully submitted:

Number of office calls	69 .
Number of house calls	149
Number of prescriptions written	139
Number of confinements	2
Number of vaccinations	3
Number of calls to the Police Station	50
Number of calls to the City Home	20
Number of calls for the Police Ambulance	10
Number of calls to sick firemen	2
Number of reports made of sick firemen	2
Number of calls to sick policemen	9
Number of reports made of sick policemen	9

The last six months of the year were singularly free from cases of severe sickness among the poor of the city. The year was also marked by the fact that requests for aid, with few exceptions, came only from the worthy and deserving poor.

Patients requiring surgical care have been sent chiefly to the Homoeopathic Hospital, in Boston. The services rendered by this institution were most satisfactory in every way.

Formerly many city patients were sent to the Malden

Report of the City Collector

Medford, Mass., January 1, 1917.

Report of the Inspector of Animals

Medford, Mass., Jan. 1, 1917.

Hon. Benjamin F. Haines, Mayor of the City of Medford.

Dear Sir :-

Following is a report of the work done by me as Inspector of Animals for the City of Medford for year ending December 31, 1916.

Tuberculosis: During the past year tuberculosis was found to exist in cattle on five different premises, one cow being found on each premises. These cattle were condemned and killed under State supervision and the premises occupied by same were cleansed and disinfected by the owners. Instructions were received from the State Department of Animal Industry to the effect that Inspectors of Animals must revisit premises, where tuberculosis has been found to exist, three months after the disease is found and make careful physical examination of such cattle as may be on premises at time of visit. I accordingly visited the five places mentioned above and made physical examination of twenty-eight head of cattle but failed to find any further indication of disease. Two cows were brought into the city from out of the State and were examined and released.

Glanders: The city was very fortunate in having had only one case of glanders within its boundaries during the year. This horse had only been in the city three days, having been bought at auction in Boston. I believe the reduction in the number of glander cases is due mostly to the fact that all watering troughs in Boston, Somerville, Cambridge, Malden, Chelsea and Medford have been closed for

MEDFORD HISTORICAL SOCIETY.

ac.2814.

REPORT OF INSPECTOR OF ANIMALS

the past two years thereby eliminating a great source of contagion. One horse reported as suspected of having the discesse proved upon test not to be affected.

Mange: Four horses affected with mange were moved to Medford from Jamaica Plain. These horses were placed under quarantine and remained so until the disease was cured when they were released.

Rabies: Only two cases of rabies in dogs were found during the year. One dog bit three persons, all of whom took the Pasteur treatment. Both of these animals were stray dogs, the owners not being located, one of them coming into Medford from direction of Malden. One of these dogs was supposed to have bitten a dog which was immediately placed in quarantine and kept under observation for ninety days when it was released. Five persons were reported bitten by dogs and the dogs were kept under observation for fourteen days and released.

Inter-State Horses. State regulations are still in force requiring a permit in order to bring horses into Massachusetts from New York, Rhode Island and Connecticut. Under this regulation about thirty horses were brought into Medford from these states and were examined and released as free from symptoms of contagious disease. Most of these horses were received at Combination Park, being race horses.

Barn Inspection. Owing to the bad weather during February and March the annual inspection was somewhat delayed. Forty barns were inspected, containing 207 head of cattle, 922 swine and 8 sheep. The condition of premises where cattle are kept continues to improve from year to year; recommendations were, however, made at nine stables for improvements, all of which were complied with.

Respectfully submitted,

HARRIE W. PEIRCE, M.D.V.,

Inspector of Animals.

291

Report of the Highway Department

Medford, January 2, 1917.

Hon. Benjamin F. Haines,

Mayor of Medford.

Dear Sir:-

In response to your request, and in compliance with the City Charter, I submit the following report of the work in the Highway, Gypsy and Brown Tail Moth Departments, for the fiscal year 1916:

City Stables and Yard.

I again recommend the purchase of the land adjoining: the yard, as we are unable to store any surplus materials, and when buildings are erected for the steam-rollers and the trucks, we shall be almost entirely without space.

Bridges.

to be an in the world and and

I wish to again call your attention to the bridge at Winthrop and South streets, which is in a very bad condition.

A new bridge should be built as early as possible.

Signs are posted on the bridge, stating the dangerous: condition.

Collection of Ashes.

New buildings and the increased distance for hauling to

the dumps, which is becoming a serious problem in the ceastern and western sections of the city, mean a larger increase each year in the expenditure.

The following schedule shows the increase for the past flew years:

with an H to week at the

Collection of House Offal.

In this division there is also a large increase, both in the amount of the collections and in the distance of the cartage,, which used to be to the City Yard, but now to the City Ledge.

A new Receiver should be built to receive the offal, as: the present arrangement is only temporary and unsatisfactory.

The following schedule shows the increase in the collection of offal, for the past few years:—

Year.	*	Loads.
1911		1,950
1912		2,053
1913		2,144
1914		2,221
1915		2,350
1916		2,635

Gypsy and Brown Tail Moths

This department is taking due care in this work, and II think the results shown are equal to any neighboring city.

General Repairs of Highways.

All streets throughout the city were repaired in the early spring and during the year.

This account has to carry a large amount of work, parts of which does not show, such as cleaning drains, basins, snow work, etc.; in fact, everything outside of new work.

Every street in the city was cleaned during April, and daily work done by the section men, costing approximately six thousand dollars.

There were removed one thousand eighty-five single loads and one thousand eight hundred twenty-three double loads of street cleanings, during the year.

Sidewalks and Edgestones.

Too much of sidewalk work cannot be done, as good sidewalks of a permanent nature are a credit to the city and desirable at all times.

Sidewalks and edgestones have been laid this year, as follows:—

Drainage.

New drains have been built this year, as follows:

Grant avenue Marion street
Hancock street Newbern avenue
Johnson avenue Pinkert street

Malden street Summer and Marston streets

Valley street to Forest street

All catch basins have been cleaned and are being cleaned, at the present time.

Each cleaning costs about seven hundred dollars, and shows very little in regard to street improvements.

Street Watering and Oiling.

All streets, as ordered by the Board of Aldermen, were oiled, watered or tar coated.

The length of streets treated is about 48.09 miles; the area watered is about 799,813 square yards.

The usual measurements of frontages have been made, amounting to 437,714 feet or 82.90 miles; the rate being four cents per foot.

Snow Removal.

There being no appropriation for the Snow Account this year, all labor, etc., in the care of snow had to be carried by the General Repairs of Highways account, which shows no returns for the money expended.

Trees.

There were two hundred (200) trees set out and protected in different sections of the city.

The usual spraying for the Elm Leaf Beetle was done, dead wood removed and trees trimmed.

Report of Trustees of Public Library

Medford, Mass., March 24, 1917.

i

· Hon. Benjamin F. Haines,

Mayor of Medford.

Sir:

The trustees of the public library herewith present their annual report for the year 1916:

The work of the library has been carried on as usual and we believe to the satisfaction of our patrons.

Our great handicap is the lack of funds with which to successfully prosecute our work.

So large a part of our appropriation is at present used up by the necessary expenses that we are unable to purchase all the books that we really need in order to comply with the ordinary demands of our borrowers.

Many libraries have endowments, but with the exception of three small funds we are not thus favored.

We should also be able to establish more suitable branches in the remote districts of the city and thereby reach more of our citizens.

This is being done in many other cities and Medford should soon follow suit and thus keep abreast of the times.

In these days of high prices we ought to increase the salaries of our attendants. Some of them have been receiving for years the same compensation and more should be given them at this time.

Our buildings, while in need of constant repair, are kept in presentable condition, although at considerable expense.

The library has been open on Sundays the past year and

MEDFORD HISTORICAL SOCIETY.

ac. 2814.

REPORT OF TRUSTEES OF PUBLIC LIBRARY

the convenience has been appreciated by many, but we do not think those of our citizens for whom this privilege was primarily intended have been the ones to avail themselves of the opportunity thus afforded.

However, so long as we are given the needed funds we are glad to give the benefits of our institution to the public on Sundays as well as on other days.

For the details of our work we refer you to the following report of the librarian:

Report of the Librarian.

To the Trustees of the Medford Public Library:

Gentlemen:—I herewith present my seventh annual report, the sixty-first report of the library. The library was open during the year 1916, 330 days; 60 hours per week for six months of the year, and 57 hours per week during the warm months; 1,261 new registrations were received and 247 re-registrations; in all, 1,508. The approximate number of people now registered is about 8,000. While this represents only a small proportion of the population, it must be recognized that in no sense does it represent the number of people to whom the library is of use. Each book taken is undoubtedly read by other members of a family, who can not or will not take time to come to the library, while many patrons of the Reading Room use only that department, and are not required to register.

Sunday Opening.

The two experiments started in 1916 have now had a full year's trial and the results of these two experiments, Sunday opening and the establishment of the Wellington Branch, are here given. Registration on Sunday afternoon indicates that those whom the library hoped to reach have not responded to any great extent. Very little reference work is asked for and books are exchanged almost entirely by those who can and do come to the library on week days. Of the 360 people who registered during the year, only 63

317

came more than once, 106 were High and Grammar school pupils, 19 were professedly from other towns. Attendance varied in number and character according to the weather. The smallest number on any one day was 17, the largest 89. On warm and pleasant days the attendance was very slight, on cold and stormy days the rooms are filled with the disorderly and mischievous, who have frequently to be sent out. There are also visitors from out of town, who in taking their Sunday walks find the library a pleasant place to rest in. The question now is whether the good accomplished warrants the expense.

Wellington Deposit Station.

A large increase of circulation in the Wellington District over that of the last few years gives definite assurance that this deposit station was badly needed. It is possible that the best service that could be expected under the circumstances has been given. The library has been obliged to incur unexpected expenses of transportation, owing to the illness and death of Mr. Atwood, who planned to assume this responsibility, as well as the expense of the attendant, which it was understood the Wellington Improvement Association would assume. The conduct of this station proves conclusively the inadvisability of employing any but trained Constant misunderstandings and misuse of privileges occur, and the treatment of books and magazines is not properly eared for. As an entering wedge to test the need of a station in this section the use of the present quarters seems amply justified; as permanent headquarters, however, they are altogether inadequate. The same amount of salary paid to an apprentice would secure service on a par with that in the main library and at the same time fit such attendant for work in some other library when her term of apprenticeship expires. This privilege was offered to the present attendant at the beginning of the year, and declined by her, with the result that the library is the inevitable sufferer.

Circulation and Work.

103,695 books were circulated in 1916, as follows: 53,826 through the main library and delivery stations, 21,080 from the Children's Room, 26,213 through the schools, 2,577 through the new Wellington deposit station. The library now numbers 50.548 volumes. 1,918 volumes were added by purchase, 252 by gift and 104 from the Reading Room. 633 books too worn for further use have been discarded. These did not represent the wear and tear of one year, but an accumulation largely from the Children's Room, which had been set aside until the librarian could spare a few hours to pass upon their condition. 19 books from houses where there had been contagious diseases were also condemned, and 48 have been lost.

The work of the library is much hampered by the lack of a sufficient number of competent assistants. The routine work of the library is carried on by only four assistants. who besides the duties incident to the position which each holds, are obliged to collate books and periodicals for both circulating and binding, to hunt up references for all who come with requests, or ask for such service by mail or telephone, to repair every book circulated, to prepare the new books by pasting in dating slips, book plates and book pockets, marking the books so that each may be placed and found in its proper order, to keep the shelves in order, select books for the five delivery stations or for any individual who would like such assistance, instruct in the use of the catalog, to send out overdue and reserve notices and donation acknowledgments, attend to the registration, repair books from the Wellington station and as often as may be visit it. I doubt if any other library of 50,000 volumes is obliged to carry on its work with so small a force, the work of the other two members of the staff not being included in this routine work.

Headings have been written on 4,028 Library of Congress printed catalog cards and 687 cards have been written. 1,513 overdue cards, 344 reserve cards and 483 acknowledgment cards have been sent. 3,139 books have been

thoroughly mended, 1,456 collated, 15,883 lettered, 17,809 covered and 727 washed. With the present high price of paper it would seem a fitting time to give up the ancient practice of covering books, and adopt the more modern method of coating books when first circulated with a thin coating of shellac and wax which is permanent, and has not to be done over and over as the figures of covering above indicate.

The largest expenditure for repairs aside from the changes in the Children's Room, for which an extra appropriation of \$100.00 was given, was on account of the settling of the floor in the stack room, and the consequent damage to the glass floor above. The lesson learned from this may prove profitable in continuing the glass floor, which has now become an immediate necessity. Books in both the back room and in the room on the second floor are now stacked two deep and it is difficult to find them when wanted.

Now that our library has passed the 50,000 mark, it would seem questionable whether or not to admit the public, more especially the aimless and irresponsible public, to our entire collection. If more space can be assigned to open shelves of new books and some restriction of admittance to the entire library, we may possibly thereby provide the ounce of prevention which is worth the pound of cure. The change in the character of the population of Medford seems to necessitite some such provision, since so small a force as we now have cannot properly supervise the entire stack. A comparison of losses and mutilations in different classes have led us to question whether a knowledge and love of science and technology are compatible with a moral sense, since it is in these classes that damage to books is most conspicuous.

We are having numerous requests for works of music. It is possible that some overstocked music rooms in our community might help to supply our own deficiency.

Children's Room.

Changes made in the Children's Building have been the important event of our work this year. The class room pro-

vided for story telling on the second floor, with its separate entrance from the outside, marks a forward step. Miss Clark reports well attended and interested audiences to her Saturday afternoon talks. We are open to offers of outside help in this direction, and hope that during the coming year some of our gifted citizens may respond to this appeal. There must be, in our city, specialists in one direction or another who can give an afternoon to the entertainment and instruction of the children.

The enlargement of the Delivery Room has made the work much more satisfactory in providing better ventilation and in making the supervision of the room less difficult. The confusion attendant upon those alterations, as well as the necessity for closing during the epidemic of infantile paralysis, have lowered very materially the figures of circulation. On account of the latter, parents were unwilling to run any risk of contagion for their children, and it was many weeks before normal conditions prevailed.

Gifts and Loans.

A large portrait of Mr. Daniel Lawrence has been presented to the library by Mrs. Samuel C. Lawrence. As this report closes, Mrs. Lawrence has added to her gift, a portrait of Rev. Charles Brooks, author of the "History of Medford." Both portraits hang in the Reading Room. All portraits and paintings now in the library have been suitably marked, so that their identity may be fully established. Two busts, one of Shakespeare, the other of Milton, have been donated by Mrs. Henry J. Livermore. Mr. Ernest B. Hall of the Boston School of Commerce has added 10 volumes to our collection of Spanish books. From the other side of the water. Miss Dorothea Chester Paradise has sent a copy of her book, "If There Must Be Battles." The following periodicals have been donated to the Reading Room: The Auk by Mr. Edmund Bridge. Punch by Miss Katherine Stone, Rhodora by Mrs. Henrietta R. Paige of Cambridge. The King's Chapel Book Room has continued its benefae-

tions of previous years. To our collection of curios, Melvin G. Pierce has contributed a piece of oak from an original "knee" from the frigate Constitution. Norman W. Swett loaned to the Children's Room a model aeroplane, made and tested by himself. This piece of work has been a delight and an inspiration to the young people. The Printing Class of the Medford High School, under the direction of Mr. Joseph T. Whitney, instructor, has printed four lists of books on special subjects, which have been circulated as book marks. We are glad to publicly recognize the excellence of the work, and the cordial co-operation of this department of the High School with the library. We are also indebted to all of the Medford papers for printing weekly lists of books whenever they were contributed. An overcrowded schedule of work has latterly left no time to com pile such lists, all extra work of this sort being done at the expense of some other duty left undone. The libraries of Boston, Everett, Haverhill, Malden, Tufts College, Winches ter and Worcester have loaned us books at various times. and in some cases we have been able to reciprocate. The Medford Shakespeare Club has added five dollars to its fund for the purchase of dramatic literature. All donations have been acknowledged when received.

Respectfully submitted,

A. L. SARGENT, Librarian.

We recommend an appropriation of \$10,714.63 to meet the expenses of the coming year.

Respectfully submitted,

ERNEST B. MOORE,

MARY W. CLARK.

REPORT OF THE BOARD OF HEALTH

The year has been one of continued progress in efforts to control preventable diseases. The Board wishes to publicly acknowledge the enthusiastic co-operation and interest shown in our work by the Visiting Nurse Association.

The Board also wishes to express its appreciation to the physicians of our city for the manner in which they rallied to our support in reporting cases, and the help given in the school inspection undertaken to prevent an epidemic of infantile paralysis.

That the efforts of the Board during the last year have not been without results is shown by the mortality and sickness statistics of the city. There have been fewer cases of preventable diseases and a lower death rate than for some years. The Board of Health recommends the employment of a School and Tuberculosis Nurse to follow up contagious cases and pilot children that need treatment to hospitals or to visit them at their homes, to obtain co-operation of their parents in necessary operations which are essential to the well-being of the coming citizens of the city. To obtain these and other necessary reforms the Board of Health needs greatly increased appropriation which at the present time is less than needed. The inspection of milk is at the present time unsatisfactory and the only way it can be improved is by an increased appropriation for this department, that outside assistance in the analysis may be possible.

Civic righteousness, morality and happiness in a community depend to a very great extent upon a healthy mind and vigorous body which can only be obtained by eternal vigilance on the part of the health authorities and the co-operation of the public together with liberal appropriation of necessary funds to accomplish needed results.

Health is a Purchasable Commodity, and expert services can only be obtained by liberal expenditures.

Respectfully submitted,

ALFRED J. HAWKS, M.D., WARREN S. McINTIRE, F. E. CAMPBELL. M.D.

Board of Health.

REPORT OF HEALTH INSPECTOR.

Medford, Mass., Jan. 2, 1917.

To the Board of Health:

Gentlemen:—As Health Inspector, I herewith submitt my annual report, year ending December 30, 1916:

Inspections were made for the following causes:

Unclean or unsanitary premises	76;
Overflowing cesspools or privies	12:
Odor from manure	8;
Garbage carelessly handled	691
Stagnant water	20
Dumps and nuisance on vacant land	28
Cows, cow-barns, pigpens	19
Dead animals on public highway	16
Milk left at house under quarantine	27
Defective plumbing or water supply	21
Spitting on floor	2
Pest house	3.
Ordered to connect with sewer	5,
Bakeries, lunch-carts, restaurants	.12
Barber shops	
Infant boarding houses	19
No cause found for complaint	30

Respectfully submitted,

Total number of inspections.....

L. E. MORRISON, Health Inspector.

REPORT OF INSPECTOR OF PLUMBING.

Medford, Mass., Jan. 2, 1917.

To the Board of Health:

Gentlemen:—I herewith submit the twenty-third annual report of the Inspector of Plumbing, year ending December 30, 1916:

Permits issued for plumbing in new buildings383
Permits issued for remodeling plumbing, etc
Permits issued to connect old work with sewer 18
710
Total number of permits issued during the year513

Buildings where work was subjected to inspection624
Buildings where work was subjected to test437
New buildings connected with sewer
Old buildings connected with sewer
New buildings connected with cesspool
Buildings where work started last year has been com-
pleted
Buildings where work is still unfinished
Total number of inspections during the year1396
Total number of fixtures installed

Respectfully submitted,

LESLIE E. MORRISON,

Inspector of Plumbing.

3

REPORT OF INSPECTOR OF MILK.

Medford, Mass., Jan. 1, 1917.

To the Board of Health:

Gentlemen:—I have the honor to submit herewith the following report of the Inspector of Milk, for the year ending December 31, 1916:

Total number of licenses granted for the sale of milk	21 4 6
Whole number of licenses	220 10 00

The average sale of milk in this city daily is approximately twelve thousand one hundred quarts and five hundred quarts of cream.

I have collected and analyzed 232 samples of milk and cream taken from wagons and stores, and found 41 slightly below the legal standard.

I have also tested 16 samples of vinegar and 3 of butter, all of which were of standard quality. Constant watch has been kept for coloring matter and preservatives in milk in the meantime.

During the summer, suspicions were aroused that "milk powder" was being used in extending milk, by a number of the dealers.

I spent several weeks in investigating the matter and believe that the suspicions were well grounded. I took the matter up with the milk inspectors in the nearby cities, also with the Dairy Bureau at the State House. The consensus of opinion was that if the milk tested came above the legal standard, in fats and solids, no convictions could be obtained in the courts of parties using the powder.

This powder is said to be pure (skim) milk reduced and concentrated and when added to raw milk has no deleterious effect; however, I interviewed several parties and made emphatic protests against the use of any "foreign substance" in the natural milk and believe this reprehensible method of extending milk is now entirely stopped in the city, if it ever existed.

There has been a decided improvement in the cleanliness of the milk and milk plants in the city during the past year. The sediment test has proved fairly satisfactory.

Respectfully submitted,

WINSLOW JOYCE,
Inspector of Milk.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS.

Medford, Mass., December 30, 1916.

To the Board of Health, Medford, Mass.:

Gentlemen:—As Inspector of Meats and Provisions, I herewith submit the annual report for the year ending December 31, 1916.

Inspections as follows:

Grocery stores	28
Grocery and provision stores	36

REPORT OF SCHOOL COMMITTEE

Medford, Mass., December 29, 1916.

To His Honor Benjamin F. Haines, Mayor:-

Sir:—The School Committee herewith submits its annual report.

Two new school buildings have been opened and added to our list during the past year, the Fulton Street and the Hancock Schools. Two buildings are under construction, four rooms are being added to the Osgood School and a new building is being erected on the site of the Swan School which was torn down. Immediate addition must be made to the Fulton Street School to relieve the congestion at this point, due to the remarkable growth of this district. When this is done and the Junior High and Osgood School have been opened, it is hoped that the over-crowded condition of the upper grades may be relieved.

The high cost of supplies has affected the School Committee as well as everyone else. Early in the year, through the foresight of our clerk, we made favorable contracts for supplies for the year. Now, however, we find the supply houses loath to contract except at greatly advanced prices, and there is no doubt that our budget for supplies must be very largely increased.

When our schools opened last Fall, they were better supplied with coal than has been the case for several years, due to the efficient and exceptionally painstaking work of the Committee on Fuel. It is with regret that it is learned that they do not feel able to continue the work another year, and we sincerely hope that this purchasing of coal, which in no way is connected with the work the School Committee should be doing, will be early taken over by the new city purchasing agent.

Only the usual amount of repairs have been made on our buildings except perhaps in the case of the Lincoln School, where we had a severe fire. This, of course, is not as it should be, and it is earnestly hoped that some means may be provided by which our appropriation for repairs may be increased.

Nearly one thousand dollars has been spent during the year on fire alarm signals and for fire prevention apparatus, and our pupils are as well protected as possible in this line. This does not mean that all our schools are fire proof by any means.

The Committee recommends and hopes that some way may be found to employ by the year, one, if not two all around men, i. e. men of all trades. They should take care of the smaller and immediately necessary repairs in our schools, such as broken glass, doors, desks, faucets, etc. These men should have firemen's licenses and then could be used as janitors in case of sickness among our regular men. Two schools had to be closed recently because we were unable to fill the place of a janitor suddenly taken ill.

Further, it is surprising how much we expend each year for express and cartage, a great deal of this right here in Medford, between the schools. If the School Committee had a small auto truck that might be operated by one of these men, a saving in the express account surely could be made, and the work would be done more quickly and efficiently.

Regular instruction in gymnastics and gymnasium work for boys was offered for the first time, in our High School, this Fall. This was made possible by an appropriation by the Board of Aldermen last Winter. While it is only optional, it is hoped that the great value of the instruction will be so thoroughly appreciated, not only by the pupils, but by the parents, that all pupils will take the subject.

It has been suggested that the gymnasium be opened to the public. It is of course impossible to throw it open to be used at will. All successful gymnasiums are now in classes with an instructor in charge. This would mean expenditure for instruction, lighting, and janitor work, which the law does not permit us to do except for persons of school age. The School Committee will be glad to meet the Board of Aldermen on this subject at any time.

Respectfully submitted,

JOSEPH W. PHELAN,
JOSEPH C. SMITH,

Grade IX discontinued.

Comment on Table I.

Comparison of the total registration indicated in Table I with similar figures in previous reports shows an increase of 868 pupils during the past three years. This rapid growth in the membership of the schools has called for an unusually large expenditure for additional school accommodations.

The readiness with which the City has assumed this burden of expenditure not only demonstrates the faith of the community in its schools, but also encourages the Superintendent in his efforts to solve the difficult problems involved in a rapidly growing school system and thereby aids him to perform his tasks with a greater degree of efficiency.

TABLE II.—NUMBER OF TEACHERS IN THE DIFFERENT DEPARTMENTS OF THE DAY SCHOOLS, DECEMBER, 1916.

Regu	ılar Day Scl	Supervisors and Special Instructors											
	High Classes L-IV	Grammar Gr. V-VI VII-VIII	Primary Gr. I-II III-IV	Primary Grades	Music	Drawing	Physical Training	Military Drill	Sewing	Cooking	Woodwork	Totals	
Male Female	14 33	4 51	0 60	0	1 1	0 2	0	1 0	0	0	3 0	23 151	
Total	47	56	60	1	2	2	1	1	1	l	3	174	

Comparison with a similar tabulation for 1915 shows that twelve teachers were added to the staff in 1916. Eleven of the additions were made to meet the growth in attendance and one was due to the introduction in September of a course in physical training for the boys of the High School, and the employment of a man to direct the work.

Comment on Table IV.

So far as the statistics in the above table may be an indication, they show on the whole satisfactory school conditions. I am dissatisfied, however, with the amount of truancy shown. Four hundred eighty-four half-days of truancy in a year with a total school registration of 6,225 pupils may not seem alarming to some, but I believe that that number is too large and that is could be reduced and the efficiency of the schools increased thereby, if our attendance officer were free to devote his entire time to the work for which he is primarily employed, instead of using a considerable portion of the school year in taking the school census. I desire, therefore, to renew the suggestion which I have previously made that special enumerators be employed to do this work under his supervision.

Comment on Table V.

This table shows that the total expenditure of the School Department in 1916 was \$196,195.70. This sum is 38 per cent. of the total expenditure for current city expenses for the year. There are those who feel that too large a proportion of the total expenditures of the City is devoted to the schools.

The following facts explain why our schools require a relatively large fraction of the tax levy.

1. The school population of Medford is relatively large compared with most communities, e. g., the average membership of the schools of Medford for the school year ending June, 1916, was practically 19 per cent., while the similar figure for the ten other cities of Middlesex County was 15 per cent. In other words, the ratio of pupils in the schools of Medford to the population of the City for the past school year was practically 4 per cent. larger than the average for the other ten cities of the County,—only one city, Everett, out of the ten having a larger per cent. of pupils in its population. It is also true that the ratio of school pupils to the population in Medford is 3 per cent. larger than the average for the State at large.

Obviously this larger proportion of school pupils to the population operates to raise the proportion of the City's tax levy that must be expended for the support of schools.

2. A second reason why our total expenditure for schools is relatively large is the fact that the proportion of pupils in our high school to the total school population is larger than in the majority of communities, e. g., the ratio of pupils in the membership of the high schools to the total school population in the ten other cities of Middlesex County for the school year ending June, 1916, averaged 17 per cent., and the similar ratio for the thirty-five other cities of the State averaged 14.8 per cent., while in Medford the similar ratio for the same period was 20 per cent. In other words, the ratio of high school membership to the entire school membership in Medford is 3 per cent. larger than the similar ratio for the ten other cities of the County and a little over 5 per cent. larger than for the thirty-five other cities of the Commonwealth.

Inasmuch as the average cost per pupil for high school support for the cities of the State is 88.9 per cent. greater than that for the elementary grades, it is evident that Medford's relatively large high school membership must tend to make its total expenditure for support of schools a relatively large fraction of the total annual expenditures of the City.

While, for the reasons noted, our gross expenditure for the support of schools is relatively large, it is interesting to note that the amount expended per pupil in the membership of the schools is relatively small.

Figures from the latest report of the State Board of Education show that the average expenditure for support of schools for each child in the average membership of the schools for the State at large for the school year ending June, 1916, was \$42.55; for the 36 cities of the State, \$43.02; for the eleven Cities of Middlesex County, \$38.06; and for Medford, \$31.74. In other words, the expenditure for support of schools in Medford for the past school year was \$6.32 less per pupil in the average membership of the schools than the similar average for the cities of Middlesex

county; \$11.28 less than the average for the 36 cities of the State; and \$10.81 less than the average for all the towns and cities of the State combined. Of the cities of Middlesex County, only one (Woburn) expended less per pupil for support of schools than Medford; of the 36 cities of the State, only three (Woburn, Revere, Chelsea) expended less per pupil for the purpose mentioned than Medford; and of the 353 towns and cities of the Commonwealth, only 58 expended less per pupil than Medford.

The following statements may emphasize further the idea that I am presenting:—

- 1. If Medford's per capita cost for support of schools for the past school year had been as large as the average for the cities of Middlesex County, our total expenditure for schools in 1916 would have been larger than it was by \$36,163.04.
- 2. If Medford's per-capita cost for support of schools for the past school year had been as large as the average for the State at large, our total expenditure for schools in 1916 would have been larger than it was by \$61,854.82.
- 3. If Medford's per capita cost for support of schools for the past school year had been as large as the average for the 36 cities of the State, our total expenditure for schools in 1916 would have been larger than it was by \$64,544.16.

In this connection I desire to note how the expenditure per pupil in the schools of Medford for (a) teaching and (b) books and other supplies for instruction compares with the expenditure for the same items for the other cities of the state.

1. Teaching (cost for Principals and Supervisors not included) for school year ending June, 1916, based on average membership of schools.

- a. Average cost per pupil for all cities of State, \$27.87.
 - o. Average cost per pupil for Medford, \$21.75.

It appears, therefore, that the average cost for teaching in Mcdford for the past school year was less than the similar cost for the 36 cities of the State by \$6.12 per pupil. In other words, if we had expended during the past school year as much per pupil as the average for all the cities of the State, it would have cost us for teaching alone \$35,018.64 more than it did.

- 2. Textbooks and other supplies for instruction for the school year ending June, 1916, based on average membership of the schools.
- a. Average cost per pupil for all cities of the State,
 \$2.23.
 - b. Average cost per pupil for Medford, \$2.02.

It appears, therefore, that the average cost per pupil for textbooks and other supplies for instruction in Medford for the past school year was less than the similar average for all cities of the State by 21 cents. In other words, if we had expended per pupil for text books and supplies for instruction during the past school year as much as the average for all cities of the State, it would have cost us for this item \$1,201.62 more than it did.

The foregoing facts not only demonstrate that our schools are not managed extravagantly but also suggest the necessity for a larger expenditure per pupil for support of the schools than we are now making, if our schools are to be kept permanently as efficient as we desire them to be.

The most important single factor in securing good school results is the teacher. It is an impossibility to maintain efficient schools with a weak teaching corps; and to secure and hold with any degree of permancy a large per cent. of first-class teachers in a corps requires that a community pay salaries that compare favorably with those paid in other communities of like character.

Similarly, an adequate equipment of proper books and other supplies for instruction is necessary for the best results.

As I have shown, the expenditure in Medford for both of the above items does not compare favorably with that in the other cities of the State as a whole. Such a condition is a serious handicap to the administration of our schools in a manner that shall produce the best results.

Conditions in General.

In previous reports, I have discussed the various lines of activity in the schools somewhat in detail. It seems sufficient, therefore, at this time merely to say that an intelligent consideration of the results that have been accomplished during the past year in our schools reveals, on the whole, conditions that give considerable ground for satisfaction with the progress made and reasonable hope for further advancement in the year to come.

Our teachers, as a body, are well-trained for their work, anxious to take advantage of opportunities to strengthen themselves professionally, and thoroughly faithful to the interests of the children in their charge; the great majority of our citizens, as I have met them individually and collectively, are ready to co-operate in whatever way they may to aid in the administration of the schools and are appreciative of the work the schools are doing; and the standing of such of our graduates as go on to higher institutions of learning and the comment of visitors to our schools, who are unprejudiced and intelligent with respect to what may reasonably be expected, justify the belief that the money which the City appropriates for the maintenance of its schools is being used advantageously.

New Undertakings of the Year.

In the annual report for 1915, attention was called to the need of employing a competent man to direct the physical training of the boys of the high school. A request for money for that purpose was included in the School Committee's budget, the necessary appropriation was made by the Board of Aldermen and an instructor was secured who began his work with us at the opening of the present school year. The work done thus far justifies the expectation of large benefit to the boys from the opportunity in this direction. The aim of the instructor is not to produce athletes conspicuous for muscular development in any special line but, through well-chosen exercises adapted, so far as possible, to individual needs, to correct physical weaknesses and build up a well-rounded physical being in the boys. Thus far his work has been entirely with the boys of the high school. It is my hope that, a little later, it may be possible to arrange so that some of the instructor's time may be given to the direction of the physical activities of boys in the upper grades of the elementary schools. I may add, also, that our instructor, Mr. Whitten, is anxious to undertake this work whenever it may seem possible.

The most important new undertaking of the year, in my judgment, is the beginning of the junior-high-school plan of organization in our schools. Discussing the junior-high-school idea in his "Problems of Secondary Education" Dr. Snedden of the Teachers' College of Columbia University says:— "The efforts now being made in various states to reorganize curricula of training and instruction for children from twelve to fourteen or fifteen years of age, constitute undoubtedly one of the most significant and important of contemporary movements in education."

The essential features of real junior-high-school organization are as follows:—

1. The grouping of pupils of the last two grades of the elementary school with the first year pupils of the present high school organization, either in a centrally located build-

ing, or in a limited number of district centers, as the area and conditions of the community to be served may warrant.

- 2. The adoption in these grouped grades of more or less differentiated courses of study in place of the single-type curriculum that has been common throughout the elementary schools.
- 3. The adoption in these grouped grades of the departmental plan of instruction, wholly or in part, in place of the common plan of teaching in the elementary schools, whereby one person gives the instruction in all subjects of the grade.

There is a widespread feeling among thoughtful educators that the division of the school course into eight or nine years of elementary work followed by four years of high school work,—an arrangement that is purely accidental,—is not adequately efficient in preparing young people, either for advanced academic work, or for actual wage-earning conditions into which the masses must step directly upon leaving the schools.

The growth of this feeling is explained, in part at least, by the following considerations:—

- 1. In the upper grades of our elementary schools there are many pupils between the ages of twelve and fifteen years who are intellectually slow and who have been retarded in their school progress because the ordinary elementary school curriculum and plan of instruction are poorly adapted to their need. Such pupils being held back with younger children easily lose their self-respect and either leave school as soon as the law permits, or remain to do poorer work than otherwise they might.
 - 2. There are, also, many intellectually quick pupils in the upper grammar grades to whom the ordinary course of study and plan of instruction of the elementary school organization are poorly adapted. These pupils, too, frequently lose interest in their work and fail to show the degree of progress that might fairly be expected of them.
- 3. It is coming to be recognized that a form of school organization which provides for modified high_school

methods of instruction and some differentiation in courses of study at approximately twelve years of age conforms more closely to the need of the developing child, whose nature at about that period is undergoing radical change, than the prevailing organization which makes a sharp break between elementary and secondary school methods at fourteen or fifteen years of age.

As I have suggested, the result of these considerations is a rapidly increasing indorsement of the junior-high-school idea. Leading educational organizations throughout the country have approved the idea; the Departments of Education of many states, including our own, are recorded as favoring it; the Commissioner of Education for the United States has indorsed it; the National Association of State Universities favors it; and a recent investigation made under the auspices of the National Society for the Study of Education shows the plan to be in actual operation in 41 states and that 365 cities have more or less well organized junior high schools.

These facts indicate that a community which adopts the junior-high school plan of organization for its schools is in line with the progressive educational thought and practice of the times.

In my annual report for 1915, it was suggested that the adoption of the junior-high-school plan of organization in our local schools might prove a good solution of the problem confronting us in a high school already over-crowded and in a rapidly approaching congestion of attendance in our elementary schools.

After careful consideration, the School Committee approved the suggestion, which involved the establishment, as rapidly as conditions require, of three junior-high-school centers,—one in the eastern, one in the southern, and one in the western section of the City,—and voted to ask the City Government to appropriate money for the erection of a building for junior-high-school purposes in the eastern district. Money for the purpose was appropriated, the old

Swan School lot was chosen as a site, the construction was begun, and it is expected that the building will be ready for use by February, 1918.

It is planned to place in this building the seventh and eighth grade pupils of the eastern section of the City and also the first-year high school pupils of the same section. This arrangement will relieve for a time the congestion of attendance at the present high school building and also will set free several rooms at the Washington, Franklin, and Osgood Schools for future increase of attendance in the primary grades.

From the educational point of view, some advantages of the junior-high school idea, as I see them, are, briefly stated, as follows:—

- I. Differentiated courses of study and a new plan of teaching and administration tend to stimulate the interest of pupils in their school work at a time when otherwise it might easily wane; and interest is the basis of good accomplishment.
- 2. The proper carrying out of the junior-high-school idea requires a larger percentage of male teachers than prevails today in the upper grades of our present elementary school organization. This fact will prove distinctly advantageous to the best development of young people in this early adolescent period.
- 3. The proper development of the junior-high-school will demand more broadly trained teachers than are commonly employed at present in the upper grades of the elementary schools. This fact with changes in the course of study and methods of instruction will make conditions for the development of scholarship more favorable than those which prevail largely today, so that pupils who go on to the senior high school will be better prepared to profit from their work in that school. This will tend to reduce the educational pressure that, under present conditions, must be put upon high school pupils in preparing them adequately for work in higher institutions of learning.
 - 4. Many pupils go through the upper grades of the

elementary schools simply because the law compels them to remain in school until they are fourteen or sixteen years of age. In the majority of cases such pupils simply mark time educationally in the final years of the elementary schools. The differentiated work of the junior high school would provide opportunity for this type of pupil to find himself to a degree and in many instances to get initial preparation for later vocational activity.

- 5. The grouping in their work of pupils whose ideals and general needs are somewhat similar, as would result to a degree under the junior-high-school plan of organization, makes possible increased effectiveness both in teaching and in general management.
- 6. The experience of many places in which the junior-high school plan is in operation indicates that the plan tends to reduce the per cent. of needless dropping out of pupils from the schools as soon as the law permits. If we admit that education prepares one for better citizenship, and generally speaking this may be fairly claimed, then any plan of administration that tends to prolong the period of school instruction for young people is to be commended as socially valuable.

Further Enlargement of School Accommodations.

In my report for the previous year certain definite needs were indicated with respect to additional school accommodations.

In addition to the needs suggested therein, I desire to discuss briefly two other problems in this direction that confront us.

1. There is need of additional school rooms to meet the requirements of the rapidly increasing school population in the southern section of the City.

The imperative character of this need is apparent when one understands (1) that at the present time there are 51 available regular school rooms to provide for the entire section south of the Mystic River, of which 49 are in use, and that in addition one regular class is located in the sewing room at the Lorin L. Dame School; (2) that over 50 per cent. of all the above rooms that are in use contain from 40 to 50 pupils each; (3) that, upon the basis of the annual increase in the school population of this section during the past two years, six or seven additional rooms at least will be required by September, 1918, to house properly the pupils of this area; and (4) that, even if action to provide additional accommodations were begun at the earliest possible moment, such a building as it would be wise to build could not probably be made ready for use before September, 1918, at which time we shall need several rooms beyond the present number at our disposal.

In my opinion the wisest method of providing the additional accommodations required in this section is to erect another building for junior-high-school purposes on the Lincoln School lot, which is ample for the purpose.

This plan will set free several rooms in the Lorin L. Dame and Lincoln Schools for future growth in the primary grades by removing the seventh and eighth grades from these buildings, and, at the same time, it will give additional relief at the present high school by holding back in the junior-high-school for a year pupils that under our present arrangement would pass on to the central high school.

2. The second problem in this line that is before us is the condition with respect to school accommodatons for the pupils of the Fulton Heights district.

At various times during the past three years the residents of this section have called the attention of the Committee to the need, as they saw it, for a permanent school building in their neighborhood.

At the request of the School Committee the City located a single-room portable building in this area and it was put into use at the opening of the school year, September, 1915. The unexpectedly rapid increase in the number of children of school age in the district since that time has developed a congestion in the attendance at this building that calls for relief in some way. At present, in spite of the fact that all

pupils of this district above grade 3A are sent to the Curtis, Washington, and Franklin Schools, the number left for attendance in the district compels the school there to be run upon a double-shift plan with two teachers.

As I understand it, the inability, heretofore, to forecast at all accurately the development of this section has made it a matter of uncertainty what to recommend with respect to school accommodations at this point. At the present time, however, there are enough children of school age living in this district to fill a four-room building with approximately thirty pupils to a room. In view of that fact, and of the inconvenience to pupils of the lower grades who must be sent to the down-town schools, and also of the practical certainty of a continued increase in the school population of this district, I believe that the time has come to take steps to provide a permanent structure of some nature in this section for the accommodation of the primary and lower grammar grade children living therein.

Conclusion.

1

In an endeavor to be reasonably brief, I have omitted from this report much that it might be more or less interesting and profitable for the community to consider. Enough has been written, however, I think, to indicate whether or not the administration of the schools during the past year has been worthy the confidence of our citizens; and, that, it seems to me, is the prime purpose of a school report.

In closing, I desire to express my appreciation of the support given my endeavors by an earnest corps of teachers, of the continued confidence of the Committee, as a whole, and of the readiness of the community at large to approve the financial demands for school maintenance that are made necessary by a rapidly growing school population and by the gradually broadening scope of school endeavor. Notwithstanding the many difficult problems and annoying

situations that confront a superintendent of schools in the discharge of his duties, the above-mentioned conditions have made it possible for me to find pleasure in the year's work and thus to serve the interests of the schools to better advantage than would have been possible had conditions been less happy.

Respectfully submitted,

FRED H. NICKERSON,

. Superintendent of Schools.

Report of Water and Sewer Commissioners

Medford, Mass., January, 1917.

Hon. Benjamin F. Haines, Mayor,

Dear Sir :-

The annual report of the Water and Sewer Commissioners for the year 1916 is herewith submitted.

At the expiration of the term of office of Lawrence G. Brooks, Patrick Kearins was appointed for the term ending the first Monday in March, 1919.

At the organization of the new board, March 8, Mr. Kearins was elected chairman.

The year has been a very busy one; about two and a quarter miles of water main and over one mile of main sewers laid beside 396 new water and 362 sewer connections.

About one-half a mile of the above water mains were renewals of old cement-lined pipe with east iron.

The total water consumption by the city for the year, as reported by the Metropolitan Water and Sewerage Board, was 544,244,000 gallons; the low service 418,596,000 gallons and the high service 125,648,000 gallons. This figures 46 gallons average per person per day, an increase over previous years, partly accounted for in the large use for manufacturing purposes.

Superintendent Whitney being called to the Mexican border with the National Guard, June 17, we were without his services until November 24.

We recommend that there be appropriated money enough to properly care for the sewers, and the brooks and streams which are under control of the city, for Sewer Maintenance \$2,000 and Brooks and Streams \$500.

The superintendent reports work done in detail as follows:

NEW MAINS.

STREET	LOCATION	Length	Size
Acton Circle	From End to Rye Street	59 feet	6 inch
Mired Terrace	From End to Williams Street	190 feet	6 inch
Austin Street	From End. southerly	113 feet	6 inch

Total length mains in use Jan. 1, 1916, 368,547 ft. Total length mains laid, 1916 11,568 ft

Total length mains in use Jan. 1, 1917, 380,115 ft., or 71.99 miles

MAIN LEAKS

Nineteen main leaks have been attended to.

BLOW-OFFS.

Eight new blow-offs have been installed in following locations:

Fellsway Gaston Street Sherwood Road Ship Avenue Taft Street Walsh Street	End of Pipe	Toward Maverick Street Near Gaston Street North of Taft Street
---	---	--

Three blow-offs have been shifted to end of short extension. Two on Fulton street, one south of Ames street and one north of the school house, also one on Austin street.

Blow-offs were abandoned on Columbus avenue near Emerald street, Emerald street near Columbus avenue and Guild street.

NEW HYDRANTS.

STREET	LOCATION	Size Connection				
Alfred Terrace Billings Avenue Carney Street Cedar Road Circuit Street Court Street Fellsway Fifth Street First Street First Street Gaston Street Harvard Street Jackson Road Jackson Road Jackson Road Mystic Street Mystic Valley Parkway	At William Street At Willis Avenue 220 feet east of Hill Avenue North of Watervale Road Near angle toward Harvard Avenue 700 or 800 feet north of Tainter Street 220 feet north of Myrtle Street Opposite No. 30 At Middlesex Avenue 30 feet east of Bradbury Avenue 100 feet east of Brackett Street At Dartmouth Street At Woodland Road 100 feet west of Grove Street 100 feet north of Mystic Valley Parkway North of High Street At Auburn Street 200 feet west of Grove Street	6 inch				
Rye Street Sherwood Road Sydney Street Taft Street	. 300 feet south of Somerville line Near Cradock School At Fellsway West North of Fourth Street . 100 feet north of Guild Street North of Taft Street	6 inch 6 inch 6 inch 6 inch				

There are now 692 hydrants available for fire purposes which are inspected and kept in good repair by this department.

Standpipes and Fountains.

All standpipes and fountains have been cared for.

Services.

Three hundred and ninety-six new services have been installed, their length totaling 15,826 feet, 2 inches; 7,435 feet, 2 inches in the street and 8,391 feet on private property.

Twelve services have been renewed from main to cellar, thirteen from main to street line and twenty-one from street line to cellar.

One hundred and eighteen services have been cleaned and thirty-nine leaks repaired, one extended, two lowered and one thawed.

Ten services were abandoned.

Meters.

During the year we have set 393 meters on services new and taken out to clean and repair 709 meters, 57 of which were frozen.

House Connections.

Three hundred and sixty-two connections have been made with the main sewer; two connections have been extended.

Total length of connections Jan. 1, 1916.....247,880.3 ft. Total length of connections laid 1916...... 15,167.4 ft.

Total length of connections Jan. 1, 1917......263,047.7 ft. or 49.819 miles.

Sewer Maintenance.

During the year we have cared for the main sewers as well as possible.

Forty house connections have been cleared of obstructions, three of which were relaid.

Brooks and Streams.

All brooks and streams in our charge have been cleaned and cared for as usual.

The following financial statement for the year is reported by the Registrar:

MEDFORD HISTORICAL SOCIETY.

ac. 2814.

Report of Chief of Fire Department

Medford, Mass., January 26, 1917.

Hon. Benjamin F. Haines,

Mayor, City of Medford, Mass.

Dear Sir :-

It again becomes my duty to hand in to you the annual report of the Fire Department for the year ending December 31, 1916. The report will be found to contain statements embracing a report of fires and alarms which have occurred during the last twelve months, total value of property at risk, amount of insurance on same, and loss as near as could be ascertained, and such other information as I thought would be of interest.

Fire Stations.

The different fire stations are in the same condition as last year except for minor repairs, and the fitting up of a sleeping room at the Central Fire Station for the deputy chief. New outside doors will have to be provided at Combination C house, as the present doors are in very bad condition and will not stand the strain much longer. A sleeping room should be fitted up at this station for when the four new permanent men are quartered in this house the present sleeping room will be quite crowded. Combination E House needs a lot of repairs inside and out, and I recommend that an appropriation be made to paint and repair this building outside, also a new heater will have to be purchased to heat the building. The concrete steps at side entrance of Combination A House should be rebuilt.

Manual Force.

The manual force now consists of twenty-four permanent men, fifteen call-men, five men who receive one dollar for each alarm they answer; four more permanent men have been appointed during the past year. George H. Gillard, the first permanent man appointed to the Fire department was retired on a pension on December 31, 1915, and Warren W. Foye was appointed to fill the vacancy. Lieutenant W. Burton Harvey was promoted to the position of captain, and placed in charge of Combination B company. Hoseman John F. O'Neil was promoted to the position of lieutenant, and assigned to duty with Combination E company. The department is now manned and officered as follows: Chief, Deputy Chief, Six Captains, Six Lieutenants, Ten Privates on the permanent force, fifteen call-men, and five men who receive one dollar for each alarm they answer. This makes a total of forty-four members, with two vacancies. I most respectfully recommend that four more permanent men be appointed to make a crew for the new truck, and that the sum of \$4,000.00 be appropriated for that purpose.

Fire Apparatus.

All of the apparatus is in good condition at the present time except that the four combination hose and chemical wagons need new tires, the chief's car needs painting very badly, and some of the other apparatus needs touching up. I most respectfully recommend that the sum of \$3,062.00 be appropriated to change tires on Combination A, B, C and E. A-new hook and ladder truck has been purchased and will be put into commission very soon. This truck is a very powerful machine, has a six-cylinder engine, carries four hundred and twenty feet of ladders, has a forty gallon chemical tank, and the usual equipment of small tools.

Hose.

During the past year two thousand two hundred and fifty feet of two and one-half inch hose has been purchased, and at the present time we have ten thousand five hundred feet of good hose on hand. This with the usual use should carry us through the year.

Fires and Alarms.

During the past year we have had one hundred and nineteen bell alarms and one hundred and sixty-five still alarms, making a total of two hundred and eighty-four alarms for the year. Value of property at risk, \$2,101,101; insurance on same, \$1,314,926; loss, \$24,881.89.

Amount Asked to Run Department.

		,
Decorating firemen's graves	\$ 50	00
Salaries of firemen	36,181	95

Fitting up sleeping room Combination C house	159	00
Four more permanent men	4,000	00

\$48,496 95

Respectfully submitted,

CHARLES E. BACON,

Chief Medford Fire Department.

Report of the Trustees of Cemeteries

January 1, 1917.

Hon. Benjamin F. Haines,

Mayor of Medford, Massachusetts.

Dear Sir:

In accordance with the provisions of the Charter, the Trustees of Cemeteries hereby submit their annual report.

During the past year there were interments in the cemeteries of the city as follows:

${\tt In}$	private lots in Oak Grove Cemetery	93
In	single graves in Oak Grove Cemetery	86
${\bf In}$	free graves in Oak Grove Cemetery	23
${\bf In}$	Cross Street Cemetery	2
In	Salem Street Cemetery	1
		205

Included in the above are the ashes of five cremations.

There were three removals from Cross Street Cemetery to Oak Grove; two removals from Oak Grove to cemeteries outside of Medford and one removal from a private lot to a single grave within Oak Grove Cemetery.

There were placed in the Receiving Tomb during the year 12 bodies, 6 of which were interred in Oak Grove Cemetery, 1 removed out of the state for interment and 5 are now in the tomb.

Sales of Lots and Single Graves.

Lots sold during the year	20
Single graves sold during the year	97

Perpetual Care.

Amount added to the Perpetual Care Fund\$ 2,637	84
Total amount in hands of Sinking Fund Com-	
mission 42,798	92

Receipts.

Received from sale of lots\$	2,786	40
Received from sale of single graves	1,959	00
Received for care, plants, extra work, etc	2,396	3 9
Received income of perpetual care funds	1,552	74
Received by appropriation	1,500	00
_		

\$10,194 53

Disbursements.

Paid for labor, supplies and incidentals......\$10,194 53

During the past nine months, the expenses of the department have been increased approximately 25 per cent., due to increasing the pay of the laborers from \$2.25 to \$2.50 per day, a two weeks' vacation and Saturday half-holidays without loss of pay for the entire year,—the vacation and Saturday half-holidays alone amounting to \$92.50 per man. The greater part of this increase must be met by an increased appropriation as the income from the perpetual care funds made prior to 1916 are wholly inadequate to meet the increased cost of work on lots which must be done to fulfill the obligations defined in the bonds for perpetual care given to lot owners by the Town and City of Medford.

To help meet the cost of the increased operating expenses we have felt obliged to increase the charges for services and labor. Should a further increase be made in the pay of the laborers it will be necessary to further increase the appropriation to cover such advance.

A new eight-foot path, about 1,000 feet long, from Playstead Road through the new part of the cemetery is under construction, the expense of which is being met by Mr. Shepherd Brooks, and the Trustees wish to express their thanks and appreciation for his generosity. This path will prove of great convenience to the general public who use the West Medford surface cars.

In our report for last year, attention was called to the needed reconstruction of the fountain pond, but owing to a greatly reduced appropriation for the care of cemeteries and in the absence of a special appropriation for this work, we were unable to make any start, and in view of the urgent need of money for other purposes we shall convert the area used for the pond into lots, and have included in our recommendations the amount of \$400.00 to do this work.

Property.

We earnestly recommend the sale of the city's interest in the property at 222 Riverside Avenue, believing that to longer hold it will result in unwarranted expenses for repairs and taxes.

The fence on the northerly and westerly boundaries of Cross Street Cemetery is in need of material and extensive repairs, and may have to be rebuilt in a very short time.

The fence and walls at Salem Street Cemetery are in fair condition and will need but little attention this year.

The buildings at Oak Grove Cemetery are in fair condition with the exception of the need of paint on the barn and sheds.

There has been graded and loamed, preparatory to laying out into lots, about 38,900 square feet of land during the past year.

Owing to the great demand for single graves, we shall be obliged to further extend this section during the coming season.

Appropriation.

The Trustees respectfully request the appropriation of

\$5,400 for the "Care of Cemeteries" for the ensuing year for the following purposes:

Care of Cemeteries, pay rolls, incidentals, etc\$3,000	00
Fertilizers	00
Plan of old part of Oak Grove Cemetery 1,000	00
Filling and grading for fountain pond area 400	00

\$5,400 00

Respectfully yours,

ELLERY A. ARMSTRONG,
ROBERT W. THORSON,
FRED W. RAUSKOLB,

Trustees of Cemeteries.

Government of the City of Medford

(List compiled May 14, 1917.)

MAYOR.

Hon. BENJAMIN F. HAINES,

52 Central Avenue

Term expires first Monday in January, 1919.

MAYOR'S CLERK.

Richard L. Baldwin,
